(i) Strategy Plans

Council considered a report which informed on the progress of the Vision 2020 Plan.

The Vice Chancellor presented the report highlighting three main elements:

- Improving Core Business in education and research – Outlining the work undertaken to improve the quality and efficiency of the core academic business;
- Optimising the return on on investments – Ensuring that the university successfully capitalises on the large scale estate investments of the past five years such as Mountbatten and Boldrewood to improve academic performance and the student experience; and
- New transformative Projects – that have the ability to support growth, with quality, and globalisation, such as the Southampton Business School.

Council noted that the Vision 2020 was an ambitious strategy and that work was underway to align University resources and individual faculty plans in order to achieve it. The University was also becoming more effective at managing costs and improving academic and operational efficiency in order to realise the aspirations.

Council noted that there was increased involvement at all levels across the whole University with Vision 2020 than with previous strategies and that communication and engagement was being planned carefully to capitalise on this initial engagement and ensure continued commitment.

(ii) Outcomes From Business Planning

Council considered a report which set out the outcomes from the University’s Business Planning 2014/15-2016/17, and also to inform Council of the key outcomes and next steps.

Council noted that the adopted priorities of distinction, globalisation and growth and the focus on the quality of student intake were clear to the institution. In the next academic year reviews of the academic disciplines could reshape the University and inform any strategic investment that may be required. The various aspects of the business planning outcomes were noted and Council was pleased to see good progress. Deliverability was the key to success and the need to ensure 5% operating surplus was highlighted. Council noted that faculties were also working towards growth targets to increase student numbers.
RESOLVED that the outcomes of the Business Planning round 2014/15-2016/17 be noted, and the proposals for the way ahead and the Roadmap to 2020 in respect of the work that will be done on sustainability and improving the ability of the University to create longer-term business plans be supported.

(iii) Budget 2014/15 and 2015/16

Council considered a report which set out the budget and financial forecasts from the University's business planning for 2014/15 – 2016/17. The forecasts were proposed as the basis for submission of the five year forecasts to HEFCE for their 31 July deadline as part of the Annual Monitoring Statements.

Council noted that the budget showed growth with income increasing by £56.6m against the current year budget and that a 2% surplus was forecast for 2014/15, a significant step forward from the previous three years. The Director of Finance highlighted the challenge for the University in developing sustainability in University business which was required to ensure the achievement of a 5% surplus. The budget also considered the risks and it was also noted that a significant mitigation was University cash holdings and the breathing space they provided between capital programmes to build the platform of sustainable plans to deliver the vision.
