Programme Overview

Brief outline of the programme

The programme can be studied Part Time (4260).

The programme aims to facilitate your engagement with topics and debates of current concern in the contemporary film industries, to develop your critical awareness of issues in film studies and cultural management and to reflect upon different methodologies and their effective use in applied research. You will be encouraged to develop your own research interests, applying the skills and resources you acquire during the programme. At the same time, we foster a collaborative ethos in which students exchange knowledge and ideas. The emphasis is on progression towards shaping the direction of your degree yourself, rather than relying on your tutors to set the agenda for you.

Compulsory modules on the programme will enable you to engage with crucial topics concerning the contemporary film industries and film studies research. Core modules will assist you in developing your academic
research skills and ability to engage in independent study. A number of option modules are offered which will enable you to develop particular areas of interest in film studies.

Your contact hours will vary depending on your module/option choices. Full information about contact hours is provided in individual module profiles.

Learning and teaching

Seminar discussion and one-to-one tutorial sessions will enable you to develop your critical thinking skills and to engage with a range of theoretical concepts, applying them to the study of film texts and issues in cultural management. Oral presentations, both individual and as part of a group, will develop your communication skills and your ability to present your research findings in a cogent, succinct manner. They will also build your self-confidence in public speaking. Written essays, reports and a dissertation will develop your written communication skills as well as your capacity to employ a range of research methodologies. They will enable you to display your engagement with theoretical arguments and your understanding of critical debates in film studies and the field of cultural management.

Assessment

A range of assessment methods are employed to facilitate your intellectual development, understanding and knowledge as well as your communication skills. These include oral presentations, written essays, reports and a dissertation. Each of the forms of assessment is designed to encourage you to explore your own research interests and hence to develop independent critical thinking.
