Programme overview

Brief outline of the programme

This programme will provide you with cutting edge insight into the digital economy, the latest business strategies and technologies. You will learn how to create successful digital start-ups and how to help large organisations adopt technological platforms that enhance their value and deliver high performance. The programme is structured so you are able to study a variety of modules in digital business and entrepreneurship, law and web science, equipping you with the theoretical knowledge and practical skills sought by employers. The programme uses novel modules which draw upon the expertise of the Business School, Law School and School for Electronics and Computer Science. You will gain insight into the creation of new digital businesses, growth and strategic reorganisation, web architecture and technologies, with the option to specialise in legal, financing and operational modules. The programme makes use of state of the art theoretical frameworks and case studies, while being alert as to how they can be used in a ‘real world’ setting, to help you to apply your new expertise. The bespoke and contemporary modules will assist you in preparing your for your future career plans. This programme is designed for students who are planning on creating their own digital business or gaining a managerial position in larger businesses which make use of digital platforms. It is suitable for students with a background in management or the social sciences. A technical background is not required.

Your contact hours will vary depending on your module/option choices. Full information about contact hours is provided in individual module profiles.

The programme is accredited by the Association to Advance Collegiate Schools of Business (AACSB), which is an internationally recognised award of excellence in business education.

Special features of the programme

Some modules will use virtual platforms to facilitate class discussion (for example, Blackboard, Google Hangouts, Moodle, etc). Formative assessments will be delivered online to facilitate interactive learning and debate.
Learning and teaching

A range of teaching and learning methods will be utilised to ensure that the learning outcomes have been achieved. Learning activities will include:

- Lectures
- Group assignments
- Seminars
- Case studies
- Class debates and discussions
- Individual private Study
- Use of online materials
- Virtual debates through online platforms

Class activities, online discussions and problem solving exercises will enable you to gain feedback about your knowledge and understanding, prior to any formal summative assessments. Learning activities will enable you to see how entrepreneurial theory, strategic practice and web science applications are used to create successful digital businesses. In addition, all students have the opportunity to contact academics during term time to discuss matters relating to the learning, teaching and assessment on a module.

Assessment

A range of assessment methods are used on this programme to enable you to demonstrate your achievement of the intended learning outcomes, including:

- Individual written examinations
- Individual written assessments, including reports and essays
- Group work exercises, presentations, web-based material and reports

Some of these assessments will be more orientated towards theoretical frameworks, while others will involve more practical exercises. As a guide, it is aimed that written coursework will be returned within 4 working weeks.

Educational aims of the programme

The aims of the programme are to:

- Enable you to understand the main elements of digital business creation and growth in theory and practice, with special consideration to digital and web technologies;
- Generate, evaluate and apply new ideas and concepts to the business planning process;
- Explore web technologies and architectures which support the development and operations of digital businesses;
- Improve the ability of those that want to create and lead digital businesses;
- Appreciate how new technologies can be used to enhance organisational performance and value;
- Develop knowledge, skills and abilities that support the development of digital businesses;
- Provide opportunities for the development of leadership, teamwork, collaboration, communication and planning skills;
- Foster the ability to undertake rigorous, independent research.

Programme learning outcomes

A. Knowledge and understanding

Having successfully completed this programme you will be able to demonstrate advanced knowledge and understanding of:

A1. Concepts and standards that are required to create and grow digital businesses;
A2. Complexity in the development of digital businesses and the role of innovation;
A3. Web technologies and architectures which enable digital businesses;

Teaching and learning methods

You will gain understanding and knowledge of digital business concepts. This will include how to create and grow businesses through digital technologies. A1 will be achieved through a series of lectures and case studies, while A2 and A3 will be met though face to face and virtual discussions, seminars, private study, individual and group exercises. To accommodate different student learning styles, a variety of learning and teaching methods will be used.
Assessment methods
Knowledge and understanding are assessed in each module. A1-A3 will be assessed through a combination of coursework, presentations, and examinations. Some modules have a group work element where marks are awarded as a group, but the larger percentage, or the entirety of a module, will be assessed by an individual’s work.

B. Subject specific intellectual and research skills
Having successfully completed this programme you will be able to:

B1. Critically reflect upon and assess problems associated with the creation and running of digital businesses;
B2. Scrutinise and apply analytical tools and techniques associated with creating and running digital businesses;
B3. Critically examine and locate where digital and web technologies can be used in digital businesses;
B4. Analyse digital business from a wide range of cognate disciplines: including ‘softer’ features such as business models and strategy, through to systematic approaches considering web architecture.

Teaching and learning methods
You will gain understanding and knowledge of digital business concepts, how to create and grow businesses through the use of digital technologies, and how to integrate new technologies into ‘traditional’ market sectors. B1 will be achieved through a series of lectures, face to face and virtual discussions, seminars and private study. B2, B3 and B4 will be met through seminars and private study. To accommodate different student learning styles, a variety of learning and teaching methods will be used.

You will learn to conduct independent research through a dedicated module on research methods and your work on a dissertation. This project is undertaken over the summer and will enable you to explore a business problem in the field of digital business. This is an extended, independent project and involves the delivery of a 15,000 word dissertation. You are required to identify a suitable topic; design and undertake an appropriate investigation plan; identify and access sources of relevant information; plan and manage the delivery of the project; liaise with the dedicated supervisor; and write a well-presented dissertation. This will assess B1-B4.

Assessment methods
Your ability to apply the intellectual and research skills that you have learned is assessed by coursework or examination. B1-B4 will be assessed by a mix of examinations, presentations, essays and reports. You will receive feedback on your progress throughout the programme based upon your contribution to in-class activities, virtual discussions and formative exercises. The dissertation is designed to test your ability to create an independent study under your own initiative and to demonstrate that you understand a particular issue in the digital entrepreneurship field. This important assessment addresses B1-B4. A supervisor will be assigned to assist you in approaching your dissertation, but it is your responsibility to manage and undertake the work.

C. Transferable and generic skills
Having successfully completed this programme you will be able to:

C1. Collate and critically evaluate qualitative and quantitative information;
C2. Successfully communicate ideas and arguments fluently and effectively in a variety of written and spoken formats;
C3. Work effectively as an individual or in groups and recognise problems associated with group working;
C4. Scrutinise library and other resources effectively, and apply bibliographical skills;
C5. Design and implement project planning and enact problem solving.
C6. Understand the research process and how to undertake an independent and rigorous study.

Teaching and learning methods
Most modules develop some combination of the above skills though lectures, individual and group practical exercises, workshops, case studies or reading. C1 will be addressed primarily through individual coursework and the dissertation, in addition to in-class tasks where students will work with case study material which consists of different sources of data, as part of formative exercises. C2 and C3 learning outcomes will be achieved through individual and group exercises. This may include report writing, essays, presentations, or simulations. C4 will be met through the production of written group or individual work for summative assessment. C5 will be achieved through the planning and management of your workload. C6 will be achieved through a mixture of online multimedia material, seminars and principally an individual dissertation project.

Assessment methods
Some modules will involve an assessed presentation and group work, where students can demonstrate the above skills (C2-C5). Most modules require a written report and the award of MSc requires a 15,000 word dissertation (C1-C5). Many modules and the dissertation will require the use of library and online resources. C6 is assessed primarily through an individual research project. Feedback is also provided throughout the programme based upon student contribution to activities through practical exercises and discussions in class.
Postgraduate Certificate learning outcomes

Having successfully completed the PG Certificate you will be able to demonstrate:
1. An overview of concepts and standards that are required to create and grow digital businesses;
2. An appreciation of complexity in the development of digital businesses and the role of innovation;
3. An outline understanding of web technologies and architectures which enable digital businesses;

Postgraduate Diploma learning outcomes

Having successfully completed the PG Diploma you will be able to demonstrate:
1. A more comprehensive overview of concepts and standards that are required to create and grow digital businesses;
2. A more thorough appreciation of complexity in the development of digital businesses and the role of innovation;
3. A more comprehensive understanding of web technologies and architectures which enable digital businesses;

You should be aware that as the PG Certificate or PG Diploma is based on the attainment of credit rather than on passing specific modules you will be able to demonstrate the specific learning outcomes relating to the modules which you have passed.

Programme structure

The programme may be completed on a full-time basis (12 months). The first 9 months of the programme involves taught study, divided into two semesters. In the following description, the term “module” is taken to mean a discrete component of the programme with its own learning outcomes and assessment requirements. All modules are at Masters level.

The taught component of the programme consists of modules worth 60 ECTS (120 CATS) credit points in total (Level 7), where 45 ECTS (90 CATS) credits are compulsory modules and 22.5 (45 CATS) credits are chosen from an optional list. The dissertation accounts for 30 ECTS (60 CATS) and is core (must be passed). All option modules are subject to availability and timetabling constraints. The modules are provided by the Business School, Law School and School for Electronics and Computer Science.

You will study eight modules in the degree, divided equally between the semesters. In Semester 1 you will study 4 compulsory modules, to provide you with an overview of key digital business and web science concepts. In Semester 2 you will study two compulsory modules, one being research methods which will prepare you for the dissertation. You will then be able to choose one optional management/law module and one web/computer science modules. These optional modules will provide you with an opportunity to specialise in topics which are of interest to you and/or align with your future career aspirations. After the summer, you will submit a dissertation that gives you scope for investigating in depth, a digital business topic of your interest.

The information in this programme specification may change in minor ways from year to year; it is accurate at the time of writing.

The module requirements for the programme are shown below; modules which are compulsory must be taken, and optional modules may be taken.

Summary structure of the programme

See Appendix 3

Assessment mapping

See Appendix 2

Additional costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. Costs that students registered for this programme typically also have to pay for are included in Appendix 4.

Progression requirements

The programme follows the University’s regulations for Progression, Determination and Classification of Results: Standalone Masters programmes as set out in the University Calendar.
Intermediate exit

You will be eligible for an interim exit award if you complete part of the programme but not all of it, as follows:

<table>
<thead>
<tr>
<th>Qualification</th>
<th>Minimum overall credit in ECTS/CATS</th>
<th>Minimum ECTS/CATS required at level of award</th>
</tr>
</thead>
<tbody>
<tr>
<td>Postgraduate Diploma</td>
<td>at least 60/120</td>
<td>45/90</td>
</tr>
<tr>
<td>Postgraduate Certificate</td>
<td>at least 30/60</td>
<td>20/40</td>
</tr>
</tbody>
</table>

Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:

- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources
- high speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network.
- There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure filestore and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library.
- Enabling Services offering support services and resources via a triage model to access crisis management, mental health support and counselling.
- assessment and support (including specialist IT support) facilities if you have a disability, long term health problem or Specific Learning Difficulty (e.g. dyslexia)
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards
- Career Destinations, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV
- Other support that includes health services (GPs), chaplaincy (for all faiths) and ‘out of hours’ support for students in Halls (18.00-08.00)
- A Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Union Southampton provides

- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; Union Southampton provides training and support for all these representatives, whose role is to represent students’ views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

Associated with your programme you will be able to access:

- A Personal Academic Tutor
- Programme handbooks
- Module support material (increasingly in electronic form).
Methods for evaluating the quality of teaching and learning

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing student evaluation surveys for each module of the programme
- Acting as a student representative on various committees, e.g. Staff: Student Liaison Committees, Faculty Programmes Committee OR providing comments to your student representative to feed back on your behalf.
- Serving as a student representative on Faculty Scrutiny Groups for programme validation
- Taking part in programme validation meetings by joining a panel of students to meet with the Faculty Scrutiny Group

The ways in which the quality of your programme is checked, both inside and outside the University, are:

- Regular module and programme reports which are monitored by the Faculty
- Programme validation, normally every five years.
- External examiners, who produce an annual report
- A national Research Assessment Exercise (our research activity contributes directly to the quality of your learning experience)
- Higher Education Review by the Quality Assurance Agency for Higher Education

Career opportunities

Students will have access to a wide range of future career opportunities in different industry sectors, due to the programme's structure. It is expected that students will find employment in private, public and third sector organisations, due to the variety of topics studied. The focus on digital business will ensure that students will be well placed to work in dynamic entrepreneurial organisations which make heavy use of digital technologies, or are moving into the digital economy from more 'traditional' sectors. Careers in the services sector, retail, consultancy and digital businesses are a possibility, and graduates would also be suited to working in dynamic organisations.

External Examiner(s) for the programme

Name: Dr Ioannis Thanos  
Institution: Lancaster University

Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their personal tutor in the first instance.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook (or other appropriate guide) or online at https://www.sbs.ac.uk/

As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration; however, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our Disclaimer to see why, when and how changes may be made to a student’s programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's Quality handbook.

Revision History
1. Validated 17/02/2016
2. Transferred to new template 28/02/17
3. New programme name and code added for 19/20

8236 MSc Digital Business additional costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below.

In some cases you will be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University’s Fees, Charges and Expenses Regulations in the University Calendar available at www.calendar.soton.ac.uk.

<table>
<thead>
<tr>
<th>Main Item</th>
<th>Sub-section</th>
<th>PROGRAMME SPECIFIC COSTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approved Calculators</td>
<td></td>
<td>Candidates may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers. The University approved models are Casio FX-570 and Casio FX-85GT Plus. These may be purchased from any source and no longer need to carry the University logo.</td>
</tr>
<tr>
<td>Stationery</td>
<td></td>
<td>You will be expected to provide your own day-to-day stationary items, e.g. pens, pencils, notebooks, etc. Any specialist stationary items will be specified under the Additional Costs tab of the relevant module profile.</td>
</tr>
<tr>
<td>Textbooks</td>
<td></td>
<td>Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source. Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.</td>
</tr>
<tr>
<td>IT</td>
<td>Computer Discs</td>
<td>Students are free to use computer lab facilities on Campus; Outside campus students are expected to use their own PCs, laptops, etc; The university provides free access to licenced software packages.</td>
</tr>
<tr>
<td></td>
<td>Software Licenses</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Hardware</td>
<td></td>
</tr>
<tr>
<td>Printing and Photocopying Costs</td>
<td></td>
<td>In most cases, written coursework such as essays; projects; dissertations are submitted online and by hard copy. The costs of printing a hard copy for submission of such coursework will be the responsibility of the student. The cost of photocopying will also be the responsibility of the student.</td>
</tr>
<tr>
<td>Optional Visits</td>
<td></td>
<td>Some modules may include optional visits. You will normally be expected to cover the cost of travel and admission, unless otherwise specified in the module profile.</td>
</tr>
</tbody>
</table>
