Programme Specification

Leadership and Management in Health and Social Care (2019-20)

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution: University of Southampton
Teaching Institution: University of Southampton
Mode of Study: Part-time
Duration in years: 7
Accreditation details: None
Final award: Master of Science (MSc)
Name of award: Leadership and Management in Health and Social Care
Interim Exit awards:
- Postgraduate Certificate in Leadership and Management in Health and Social Care
- Postgraduate Diploma in Leadership and Management in Health and Social Care
FHEQ level of final award: Level 7
UCAS code: Programme code: 8333
QAA Subject Benchmark or other external reference: Master’s Degree Characteristics 2016
Programme Lead: Richard Giordano (rwg1u09)

Programme Overview

Brief outline of the programme

Many health practitioners and policy analysts are consumed with the challenges to current levels and quality of health and social care owing to (i) an aging population with multiple, complex health and social care needs, (ii) ongoing and painful budget constraints, and (iii) a manifest need to integrate social care and health care, particularly for the aged and most vulnerable. These three aspects alone call for managers and leaders who motivate others to the highest standards of care for the frail, elderly, and others who cannot advocate for themselves; use scarce resources efficiently to increase outcomes and safety; who can develop integrated governance, management and leadership frameworks across organizational and functional boundaries; and who can engender a stakeholder view of quality and safety through distributing leadership and authority at all levels
of an extended organization. These three challenges are by no means limited to the United Kingdom. There are high levels of citizen dissatisfaction with the level and quality of health care in at least ten countries, most of which are economically developed. The World Health Organization found that many countries are falling far short of their potential, and most are making inadequate efforts in terms of responsiveness to the sick and vulnerable. There are serious shortcomings in the performance of one or more functions—leadership, use of resources, accountability, choice of intervention, decision rights, to name but a few—in virtually all countries. These failings result in large numbers of preventable deaths and disabilities; in unnecessary suffering; in injustice, inequality and denial of basic rights of individuals, particularly children, women, and those with mental health conditions. The impact is most severe on the poor. Moreover, the nature of health and social care delivery is changing with integrated services, self-management and care at home or in the community, as well as coordination and collaboration across multiple organizations or agencies. The integration of health and social care requires the coordination of management, leadership, governance knowledge, and information across organizational boundaries. The MSc in Leadership and Management in Health and Social Care at the University of Southampton is intended to build visionary leaders who can affect the quality of care in health and social care settings, both in England and throughout the world.

Your contact hours will vary depending on your module/option choices. Full information about contact hours is provided in individual module profiles.

Learning and teaching

The conduct of the modules is informed by the following four guiding principles:
- Learning should be relevant to practitioners and their work environments;
- Practitioners should be given experience and learn through errors;
- As much as is practical, practitioners should be involved in the planning and evaluation of their instruction;
- Instruction should be problem-centred.

In practice, this means that we aim to keep lectures to an absolute minimum, and will instead adhere to these principles through practice-based and activity-driven classroom time that both delineate and make real leadership qualities, managerial skills, and their underlying theories. We will give ample opportunity to participants to construct their leadership strengths, examine their interactions with others, and apply both empirical and theoretical research to their practice.

The instructors will act more like facilitators than lecturers. For example, rather than lecturing on personal leadership theories, we will instead engage in activities that uncover (unknowing to the participant) habits of leading. Then we will explore the theory and research behind these habits. The key is for students to discover their habits of thought, their biases, etc., and then to delineate theory that at once helps to explain them and leads students to a reflective manner of working.

We use a variety of techniques and interventions, including simulations, focused discussions, debates, fishbowls, games, and guest presentations and discussions with active researchers, practitioners, patients, policy analysts, and clients. We lecture when introducing a topic or idea, and to establish the background and build the framework to guide our in class activities. We provide foundational and supplementary reading and other resources on BlackBoard that you are expected to consult in advance of the class meetings.

Assessment

As far as practical, we require you to demonstrate skills of critical inquiry and analysis that can be applied to the workplace. We are particularly interested in knowing what you learn is (or can be) applied to practice.

Each module has a set of learning outcomes. You have a choice of methods and formats (including videos) to demonstrate your mastery of those outcomes, including

- Designing policies, protocols, pathways, or implementation strategies to improve client experience, safety, or clinical effectiveness
- Constructing a business case for service redesign
- Evaluating a new or existing service or complex intervention
- Undertaking a critical incident analysis, and making recommendations
- Producing information for service users or community members
- Analysing some problem in your work environment, and proposing evidence-based solutions
- Interviewing co-workers, superiors, and/or clients, and critically evaluating your findings
- Reviewing and critically evaluating a body of research
- Critical self reflection of your leadership style or capacity
- Designing, with the help and approval or your instructor, a final project of your own

In order to ensure parity across formative assessments in the programme, you will be provided with a standard rubric and marking scheme that will apply to all forms of assessment. This will help to ensure that the intellectual content demanded from a video, for example, is the same as from an essay, business case, etc.

We encourage you to select an assessment strategy that is meaningful to you (and your supervisor, if relevant), and which at once would be helpful at your work unit, and which stretches you. Your personal tutor and individual module leader will encourage you to complete summative assessments using with different formats so that you graduate with a range of skills, perspectives and tools.

Special Features of the programme

N/A

Please note: As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration; however, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our Disclaimer to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's Quality handbook.

Educational Aims of the Programme

The three general aims of the programme are to build graduates with expertise and skills in (i) self leadership, (ii) leading others, and (iii) leading the organization. Specifically,

• To develop individual leadership and an understanding of yourself that is focused on values, character, integrity, and creativity;
• To build leadership competencies to lead groups and teams to the highest standards of excellence;
• To engender managerial skills and organizational know-how that inform tactics and strategy.

These aims sit within a framework of seven core health and social care professional values that inform our teaching.

• Health and Well-being: We care for the healthy. We support and encourage individuals to maintain and improve health, engage in meaningful activities with others, and to remain competent, independent, and resilient.
• Care: We care—provide what is necessary—for the sick, the frail, the vulnerable, and those who find it difficult or who cannot care for themselves. We promote relief from physical and mental suffering, and improve the quality of life.
• Dignity: We do not deal with cases or diseases; we encounter human beings who have an innate right to respect, and who are active participants in decisions about their care.
• Excellence: President John F. Kennedy defined happiness as “the full use of your powers along the lines of excellence”. We surpass ordinary standards to promote health and well-being, care, relief and dignity.
• Ethics: We understand right and wrong behaviour, what is best for the patient or client, and principled methods of making trade offs.
• Value: We take actions that increase quality, reduce inequities and variations in outcomes, and eliminate waste of human and material resources.
• Knowledge: We promote decisions and actions based on personal reflection, knowledge, data, and evidence.
Programme Learning Outcomes

Subject Specific Intellectual and Research Skills

On successful completion of this programme you will be able to:

B1. Develop and justify an original research question relevant to your practice/field of interest.
B2. Conduct an effective literature search related to your research question and critically appraise the literature.
B3. Demonstrate a clear understanding of different research paradigms and how to apply them appropriately to your chosen research question.
B4. Undertake and report their research to address your specific question (with appropriate supervision) thus allowing you to contribute to the growing knowledge base underpinning evidence based practice.
B5. Demonstrate an ability to analyse research data and critically interpret this in light of current knowledge and social theory.
B6. Justify your conclusions using well-reasoned arguments and taking into account the limitations or constraints of the study.
B7. Evaluate and reflect on your performance as a researcher or practitioner to make recommendations for future practice/research and explain how these recommendations might be implemented for future practice/research.
B8. Communicate findings, succinctly, critically and objectively in a clearly focussed paper
B9. Prepare and manage data for the analysis of healthcare or social care quality.
B10. Analyse administrative, patient and financial data, and being aware of their strength and limitations.
B11. Appreciate the advantages and constraints of common techniques to analyse healthcare organisations.
B12. Critically reflect on healthcare quality concepts, policies and methods.
B13. Analyse the pathway from national policy to local implementation.
B14. Demonstrate a clear understanding of ethics, and research governance principles in relation to your chosen area of research.
B15. Evaluate health services research methods in relation to specified health service research questions (eg relating to financing, organising, managing and delivering health services).
B16. Discuss models of evaluation in relation to a specified health service innovation
B17. Explore the role of research methods in the context of improving health or social care services.
B18. Evaluate issues surrounding the measurement of outcomes of health services.

Teaching and Learning Methods

For the dissertation component, you will be guided and supervised by an academic member of staff who has knowledge of your subject area.
• Seminars and discussions with active researchers from the School of Health Sciences and elsewhere.
• Action learning sets
• Laboratory sessions
• Peer-to-peer analysis sessions

Assessment Methods

The assessment approaches outlined earlier in this section are appropriate here, but in addition you will also complete an MSc dissertation.

Transferable and Generic Skills

On successful completion of this programme you will be able to:

C1. Empower. Our graduates should be empowered along the following dimensions.
   • Innovation. To encourage innovative thinking in themselves and others
   • Responsibility. To assume overall responsibility
   • Resources. To acquire, direct, manage resources.
   • Authority. To cede authority to others
   • Time. Providing time to themselves and to others to learn and reflect

C2. Set boundary conditions
   • Setting realistic and compelling goals to improve health outcomes and improve the quality of life for service users and clients
   • Establishing behaviours and expectations that engender excellence
   • Peer learning and knowledge sharing
   • Improve quality and safety
   • Data and evidence-driven decision-making and evaluation

C3. Lead at the microsystem level by
   • Building team and peer beliefs around quality, safety, effectiveness, and dignity
   • Building a culture of shared decision making
   • Supporting individual responsibility and accountability
   • Applying research, theory, and fundamental principles to your practice

Teaching and Learning Methods

The teaching and learning methods outlined above serve these outcomes.

Assessment Methods

It is difficult to assess these outcomes in a classroom environment. Instead, we will ask you to self-assess against these outcomes, possibly asking you a year or more after you complete the programme. When appropriate and practical, we may ask your immediate supervisor to assess the impact of the MSc on your work practice and its effects on your organisation.
Programme Structure

The programme structure table is below:
Information about pre and co-requisites is included in individual module profiles.

Part I
The logical structure of the programme guides participants through a segments starting first with understanding and leading yourself, and then building upon that to leading others, and finally to lead organisations. We strongly suggest that you take modules in this order.

The programme structure for the MSc is as follows:

- 90 credits are HE7 level (60 taught ECTS credits plus an evidence-based project/dissertation of 30 ECTS credits)
- Individual modules: specified credits at HE7 level.

(*ECTS = European Credit Transfer Scheme).

You may apply to suspend from the programme temporarily for a specified period which will not normally exceed 12 months. Except in exceptional circumstances, permission to suspend will only be granted where you can still complete the programme within the time limit defined by the regulations.

The programme may include lectures, seminars, tutorials, practical work, coursework, contract learning and projects as specified for individual modules.

Postgraduate master’s programmes are constructed from modules, the majority of which are set at level 7. However, as described within the Programme Structure Section of this Programme Specification some study in the (Postgraduate Certificate in Advanced Health Assessment and Prescribing) Programme may be undertaken at level 6. The module pass mark for students enrolled on this postgraduate programme, regardless of academic level is 50. Some modules may be marked only as Pass or Fail. When a mark is awarded it will contribute to the final degree classification.

Academic credit, up to a total of 10 ECTS (20 CATS), awarded from the successful completion of University of Southampton modules taken PRIOR to enrolling on this programme may be used towards the final award. Academic credit awarded from the successful completion of University of Southampton Level 7 modules taken PRIOR to enrolling on this programme may be used towards the final award. In this case the mark will contribute to the final degree classification.

Students may make a claim for the recognition of prior learning in accordance with University of Southampton regulations. RPL enables recognition of achievement from a range of activities using an appropriate assessment methodology. Provided that the assessment requirements of a given module or qualification have been met, the use of RPL is acceptable for accrediting a module or part of a programme through a process of credit transfer, within the limits specified in the University's Credit Accumulation and Transfer Scheme.

Exit Points
Candidates who have satisfied the examiners and who have accumulated the requisite number of credits shall be awarded the qualification for which they have registered.
Postgraduate Certificate in Leadership and Management in Health and Social Care

Candidates who elect to exit the programme after achieving 30 ECTS credits at HE7 level in
- Self-Leadership Core module 10 ECTS credits
- Leading Others Core module 10 ECTS credits and
- Leading and Managing Organizations and Systems Core module 10 ECTS credits
may be awarded a Postgraduate Certificate in Leadership and Management in Health and Social Care.

Postgraduate Diploma in Leadership and Management in Health and Social Care

Candidates who elect to exit the programme having achieved 60 ECTS credits at HE7 level may be awarded a Postgraduate Diploma in Leadership and Management in Health and Social Care. For the award of Post Graduate Diploma (60 credits) students must earn 30 ECTS credits at HE7 level in
- Self Leadership Core module 10 ECTS credits
- Leading Others Core module 10 ECTS credits and
- Leading and Managing Organizations and Systems Core module 10 ECTS credits MSc Leadership & Management in Health & Social Care: Academic Year 2017-18

Plus:
30 ECTS credits at HE7 level from the following modules. - Policy and Governance (10 ECTS credits)
- Health By Design (10 ECTS credits)
- Research Methods for Evidence-Based Practice (10 ECTS credits)

MSc in Leadership and Management in Health and Social Care
For the award of MSc (90 ECTS credits) students must successfully complete
- Self Leadership Core module 10 ECTS credits
- Leading Others Core module 10 ECTS credits and
- Leading and Managing Organizations and Systems Core module 10 ECTS credits

Plus:
- Research Methods and Evidence-Based Practice Core module for the MSc 10 ECTS credits

Plus 20 ECTS credits from the following modules.

- Policy and Governance Core Module 10 ECTS credits
- Health By Design Core Module 10 ECTS credits

Plus successful completion of the MSc dissertation (30 ECTS credits)
You must have submitted the assessments for all other modules in the programme prior to submitting the dissertation.

Dissertation
For the MSc, you will be required to complete successfully an evidence-based dissertation.

Candidates who have satisfied the examiners and who have accumulated the requisite number of credits shall be awarded the qualification for which they have registered. Students who elect to leave the programme with a Postgraduate Certificate or Postgraduate Diploma may normally rejoin the programme up to two years after the date of their exit with the Postgraduate Certificate or Postgraduate Diploma.

You must have submitted the assessments for all other modules in the programme prior to submitting the dissertation.

Progression Requirements
The programme will follow the University's regulations for *Progression, Determination and Classification of Results: Standalone Masters Programmes* as set out in the General Academic Regulations in the University Calendar: [http://www.calendar.soton.ac.uk/sectionIV/sectIV-index.html](http://www.calendar.soton.ac.uk/sectionIV/sectIV-index.html)

Support for student learning
There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:
- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources
- high speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices: laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure filestore and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library.
- Enabling Services offering support services and resources via a triage model to access crisis management, mental health support and counselling. Support includes daily Drop In at Highfield campus at 13.00 – 15.00 (Monday, Wednesday and Friday out of term-time) or via on-line chat on weekdays from 14.00 – 16.00. Arrangements can also be made for meetings via Skype.
- assessment and support (including specialist IT support) facilities if you have a disability, long term health problem or Specific Learning Difficulty (e.g. dyslexia).
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards
- Career and Employability services, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV
- Other support that includes health services (GPs), chaplaincy (for all faiths) and ‘out of hours’ support for students in Halls and in the local community, (18.00-08.00)
- A Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.
The Students’ Union provides
- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students’ views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

The School Provides
- You will be able to access a personal tutor in the School. The tutor can provide help and information relating to your academic progress or for dealing with personal issues.
- The School also is able to provide one-to-one help with academic writing and study skills.
- The University provides library support, tutorials on how to use the library effectively, help with using bibliographic management software, and access to a large selection of online and printed resources.
- The university provides an excellent Student Services Team to ensure a successful time here. Services include supporting students with a wide range of disabilities, health conditions. (including mental health difficulties), and learning differences; Help with accommodation; A First Support team is dedicated to being the first point of contact and supporting students during times of crisis.
- The Southampton University Students Union (SUSU) offers help and advice confidentially to all students.
- Overseas students find SUSU to be particularly helpful with settling in and understanding university life in England. The University International Office Team can help overseas students with visa questions, and with registering with the National Health Service.
- You should always feel free to approach the Programme Lead or your tutor if you need any form of help or assistance.

Methods for evaluating the quality of teaching and learning

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Student evaluation questionnaires for each module of the programme
- Most lecturers reserve part of the last meeting of a module as an evaluation session
- Acting as a student representative on the School staff-student liaison committee
- Providing feedback to student reps to be reported to the Programme Lead

- The ways in which the quality of your programme is checked, both inside and outside the University, are:

- External examiners, who produce an annual report
- Annual module reviews
- Periodic programme reviews
- Higher Education Review by Quality Assurance Agency
- Students are encouraged to participate in both the module and programme reviews.

Further details on the University’s quality assurance processes are given in the Quality Handbook.

Career Opportunities

Graduates of the programme have assumed leadership and management positions in health and social care; consulting; human resources; auditing and health policy.

External Examiner(s) for the programme
Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their Personal Academic Tutor in the first instance.

**Please note:** This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook.
Appendix 1:

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme also have to pay for:

Additional Costs

<table>
<thead>
<tr>
<th>Type</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parking costs (including on placements at hospitals)</td>
<td>It is advisable to take public transportation to the University. In the event that you choose to drive, parking costs can be found here: <a href="https://www.southampton.ac.uk/estates/services/carparking/visitor_parking.html">https://www.southampton.ac.uk/estates/services/carparking/visitor_parking.html</a></td>
</tr>
<tr>
<td>Stationery</td>
<td>You will be expected to provide your own day-to-day stationary items, e.g. pens, pencils, notebooks, etc. Any specialist stationery items will be specified under the Additional Costs tab of the relevant module profile.</td>
</tr>
<tr>
<td>Textbooks</td>
<td>Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source. Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.</td>
</tr>
<tr>
<td>Other</td>
<td>It is not a requirement that photographs or reproductions are needed in any assignment. In the event that you choose to include photographs or reproductions, you will supply the photographic equipment as well as the costs of processing and printing. Costs will vary depending on the type of equipment and printing you choose.</td>
</tr>
<tr>
<td>Recording Equipment</td>
<td>It is not a requirement that recordings are needed to satisfy any assignment. In the event that you choose to include recordings, you will supply the recording equipment as well as storage media such as memory cards. Costs will vary depending on the type of equipment and media you choose.</td>
</tr>
<tr>
<td>Printing and Photocopying Costs</td>
<td>You may need to submit both an online and printed version of assignments. A list of the University printing costs can be found here: <a href="https://www.southampton.ac.uk/isolutions/students/printing/">https://www.southampton.ac.uk/isolutions/students/printing/</a></td>
</tr>
