

Part A – University of Southampton Doctoral Programme Profile 2019/20

Part B - Doctoral Programme Profile

Archaeology 2019/2020

This Archaeology Doctoral Programme Profile accompanies the University of Southampton *Doctoral Programme Profile 2019/20*, and details additional Faculty/programme specific information.

Awarding Institution	University of Southampton
Teaching Institution	University of Southampton
Mode of study	Full time
Duration in years	48 months following standard progression for a FT student 84 months following standard progression for a PT student
Accreditation details	N/A
Final award	PhD
Name of award	PhD
Interim Exit awards	MPhil
FHEQ level of final award	8
QAA Subject Benchmark	QAA Doctoral Degree Characteristics Statement (2015)
Programme Lead	Professor Andrew Jones
Date specification was written Date	12/09/2016
Programme was validated	31/05/2018
Date specification last updated	12/09/2019

All Doctoral Programme Profiles should be read alongside the University of Southampton's *Doctoral Programme Profile 2019/20* and the University of Southampton's [Regulations for the degrees of Master of Philosophy and Doctor of Philosophy](#) and the [Code of Practice for Research Candidature and Supervision](#).

Programme Overview

Brief outline of the programme

The University of Southampton is strongly committed to providing the very best learning experience to all our students in a friendly and stimulating environment. We are known nationally and internationally for our excellence in research and teaching, and are continually improving the scope and delivery of our activities, we aim to generate a community of doctoral graduates equipped to act as research leaders in the discipline of Archaeology.

Archaeology offers supervision for research from a wide range of areas, from the Palaeolithic to industrial archaeology, from the interpretation of material and culture to the politics of the past. Students will have an opportunity to join a lively research community and to be supervised by world renowned experts in their specialism. In addition to specialist seminars and guided tutorials, students will have access to training sessions on such topics as academic writing, and conference organisation.

The programme is also available as a distance learning programme, which is designed for people who wish to study without travelling to Southampton regularly. The distance learning version of the programme is in compliance with the University's Distance Learning framework (http://www.southampton.ac.uk/quality/pgr/modes_types_study/phd_distance_learning_framework.page?). Students are required to complete an Individual Arrangements Form with their supervisor at the first supervisory meeting of candidature.

Aims of the Programme

The aims of the programme are to:

- provide knowledge and understanding of a chosen area of archaeological study at an advanced level and training in established research techniques appropriate to the area;
- develop a capacity in students for original research based on a thorough understanding of their chosen field in collaboration with their supervisor;
- provide students with a broader and deeper theoretical and methodological awareness;
- produce theses and subsequent publications that contribute to the development of and understanding of the chosen area of archaeological study;
- offer students a supportive environment so that they feel that they are part of a community of scholars and are well placed to pursue a career building on their accomplished research;
- give students the opportunity to present their work to colleagues, and to bring the student into contact with the wider research community, enabling them to build networks with others researching in the same field.

Programme Structure

The following summary should be read in conjunction with the Faculty Graduate School SharePoint site (<https://groupsite.soton.ac.uk/Administration/Humanities-Graduate-School/Pages/Home.aspx>) and the University Regulations as specified in the [Calendar](#):

Unlike undergraduate study, the open-ended nature of research means it is not possible to always predict the structure of a programme of study leading to a thesis. Research students are however, all required to undertake three Progression Reviews during their studies, as detailed in the [Code of Practice for Research Candidature and Supervision](#). The timetable shown below is indicative of what you can expect. Maximum candidature is 48 months in full-time registration, 84 months in part-time Registration. Candidates may be in receipt of funding for shorter periods. The timings listed below are those for a full-time student. Timings for a part-time student are adjusted suitably.

Programme details

Year 1

By the end of three months you should have completed your academic needs analysis and highlighted any modules or training that should be attended to enhance your studies, confirmed your full supervisory team and written an outline of the motivation for your research, together with a plan of work for year 1. It is expected that you will take a mixture of substantive, technical and skills training courses throughout the year to develop the skills that you need for the whole PhD process.

Throughout the year you will be expected to develop knowledge in your chosen area of research through reading and developing a review of previous work in the area. You will also be developing your research questions for your research and starting to conduct analyses, where appropriate. The relative timescales for these tasks will be discussed with your supervisors.

By the end of month 12 you will need to have passed the first progression review milestone (or month 24 for part time students). This involves submitting written work with a 1st progression review form and attending a review meeting (first progression review) conducted by at least one of your supervisors and an independent assessor. This is to ensure that the research is progressing well and on target, and provide an opportunity for issues to be raised about the programme or the supervisory arrangements.

Students have the opportunity to meet regularly with the members of the Faculty, the Graduate School, including the Archaeology Doctoral Programme Director, the Director of Graduate School, and other relevant academic staff, at a mixture of training and networking meetings. This gives ready access to an independent and impartial source of advice about any issues a PGR may be having during their studies.

Year 2

Your progress on the programme will continue to be monitored and assessed as specified in the University's *Code of Practice for Research Candidature and Supervision*. In this year you are expected to expand on the work started in year 1 and to enter fully into the analysis of the research questions.

Between months 18 and 24 of your candidature (months 30 to 48 for part time students) it is expected that you will submit a confirmation thesis. You must successfully meet the requirements of the **Confirmation of PhD Registration** (Second Progression Review) if you wish to submit for a PhD. The criteria you must meet in order to be confirmed to PhD status and the process which must be adhered to is outlined in the University's Code of Practice and the Faculty's Graduate School SharePoint site. Candidates unsuccessful at this review may be allowed to transfer to the MPhil degree programme.

If you meet the requirements for confirmation you will remain on the PhD programme, otherwise you may either request to be transferred to an MPhil or be given further time to meet the requirements of the Confirmation Panel. Failure to meet the criteria for a successful progression review will lead to the termination of your PhD candidature.

Training requirements for year two will be discussed with your supervisory team and this training will be followed up throughout the year.

Year 3 (36 months)

Evidence of continued progress is provided by publications and presentations in a suitable venue (e.g. an international conference). It is unlikely that further major training will be needed at this stage. The target date for submission of your thesis is normally at the end of year 3 (36 months) as this may coincide with the end of any supporting studentships.

Towards the end of your third year there will be a review meeting (the Third Progression Review) conducted by your supervisors. In most cases you will be required to produce a short report on your progress since confirmation, identify publications and other research outputs, and the work left to complete your thesis. If your progress at this review is deemed to be unsatisfactory, a full review will be conducted with an independent assessor.

Year 4 (48 months) (and higher for part time)

For students in full time registration, the final thesis (whether MPhil or PhD) must be submitted *at the latest* by the end of the 48th month (for candidates in part time registration the deadline for submission is 84 months) (excluding periods of suspension) unless special dispensation is granted by the Graduate School. The latter will only be granted rarely, in the case of exceptional and unforeseen circumstances.

Programme Outcomes

Having successfully completed this programme you will be able to demonstrate:

- the creation and interpretation of new knowledge through original research or other advanced scholarship, of a quality to satisfy peer review, extend the forefront of the discipline and merit publication;
- a systematic acquisition and understanding of a substantial body of knowledge which is at the forefront of an academic discipline;
- the general ability to conceptualise, design and implement a project for the generation of new knowledge, applications or understanding at the forefront of the discipline, and to adjust the project design in the light of unforeseen problems;
- a detailed understanding of applicable techniques for research and advanced academic enquiry.

Knowledge and Understanding

Having successfully completed this programme you will be able to demonstrate knowledge and understanding of:

- current theoretical principles underlying your chosen field of study;
- current research issues relevant to your PhD topic in archaeology;

- theory, practice, analysis and interpretation of data in your PhD, including the systematic understanding of a substantial body of knowledge;
- theoretical and empirical developments at the research frontiers of your PhD topic in archaeology.

Learning and Teaching Methods

You will develop core knowledge and understanding through your own research and guided independent study via individual supervision meetings. In addition, you will further develop via participation in research seminars.

Assessment methods

Assessment methods will include written examinations, oral presentations, written assignments, research proposal, progression reviews, including **Confirmation of PhD Registration** and a thesis with viva voce as described in Part A

Subject Specific Intellectual and Research Skills

Having successfully completed this programme you will be able to:

- interpret and critically evaluate information from both primary and secondary sources;
- synthesise ideas and apply creative and original thought to complex research questions;
- develop, modify and apply existing theory in novel situations and circumstances;
- create and evaluate new knowledge through research of a quality to satisfy peer review and merit publication.

Learning and Teaching Methods

Guided and independent research on the chosen topic. Methods will include tutorials, participation in seminars and extended periods of self-study, including relevant fieldwork.

Assessment methods

Project based assignments, progression reviews, including **Confirmation of PhD Registration**, theses, viva voce exams as described in Part A.

Support for student learning

Learning and Supervision

You will develop core knowledge and understanding through your own research and guided independent study via individual supervision meetings. In addition, you will further develop through opportunities to engage with a range of seminar meetings around the interests of the research clusters and centres within the discipline.

Students on the Distance Learning Pathway will have electronic access to learning resources (e.g. Blackboard; VLE; EAP Toolkit, an online English for Academic Purposes self-access resource; as well as additional support from the learning technologists based in the Faculty's eLanguages unit. The Hartley Library offers an extensive and growing collection of e-books and electronic articles (JSTORE).

Research students are allocated a supervisory team of at least two members, one of whom will be the main supervisor. The supervisory team typically either consists of a main supervisor and a second supervisor, or for a multi-disciplinary project more than one co-supervisor (one of whom must still be designated as the main supervisor).

Applicants may indicate a preference for the supervisory team on their application form, but the names will not be confirmed until a formal offer is made. In some cases, the composition of a supervisory team may change as the research project evolves and in response to other circumstances.

In addition to the University-wide learning support, students studying on the Archaeology doctoral programme will be able to access:

- academic supervisory team who will provide advice and support throughout the programme and who are actively engaged in research closely related to your chosen area.
- other staff in the Academic Unit

- systems for the support of student learning within the Faculty.
- work space and provision of a laptop during your studies (further information is available in the faculty's Working Space Policy, available on the Graduate School SharePoint site).

The Faculty also offer the following learning support:

- Induction programme for orientation, introduction of the programme and staff, and dissemination of materials.
- Faculty specific information can be found on the Humanities Graduate School SharePoint site.
- Guidance on selection of technical modules.
- Access to all administrative and academic material on the Faculty, Programme and individual module web sites and Blackboard
- An opportunity to meet with the Graduate School (which comprises an academic representative from each Academic Unit as well as the Director of Graduate School) at a mixture of training and networking meetings. This gives ready access to an independent and impartial source of advice about any issues you may be having during your studies.
- Infrastructure to support your research.
- Access to other staff of the Faculty.
- Access to Faculty cluster of computers with relevant specialist software.

Fees, Additional Costs and Funding

Costs that students registered for this programme typically also have to pay for are included in Appendix 1

Intermediate exit points (where available)

MPhil: In some cases, research students may not or cannot continue through to completion of the PhD. Students may make such decisions for themselves, or it can be based on unsatisfactory performance at one of the formal milestones described above. If a student decides to carry out research, but at MPhil, they will need to transfer onto an MPhil programme. In any case, an MPhil may be awarded only after successful examination of a suitable thesis by an internal and external examiner and passing a viva voce. See the University Calendar for further details on the award of an MPhil.

Admission

The University's Admissions Policy www.southampton.ac.uk/admissions_policy applies equally to all programmes of study. The following are the typical entry criteria to be used for selecting candidates for admission. The University's approved equivalencies for the requirements listed below will also be acceptable. Applicants should refer to their specific offer conditions on their offer letter.

Qualification	Grade/GPA	Subjects requirements	Specific requirements
Bachelor's degree	1 st class or a good 2:1	Archaeology or cognate discipline	Personal statement, research proposal, a sample of written work between (5000 words maximum)
Master's degree	Merit	Archaeology or cognate discipline	

Recognition of Prior Learning (RPL)

The University has a [Recognition of Prior Learning Policy](#)

English Language Proficiency

The requirements for this programme are at least B and C in an accepted English Language test. For IELTS this equates to:

Overall	Reading	Writing	Speaking	Listening
6.5	6.5	6.5	6.0	6.0

The University's Admissions policy on English Language requirements can be found [here](#):

Career Opportunities

Graduates with a PhD in Archaeology from Southampton go onto teach, lecture and contribute to archaeology and heritage in a variety of ways. The transferable skills, such as critical awareness, cultural awareness, communication and presentational abilities (verbal and visual, often in public engagement contexts), numeracy, deadline and project management are also highly valuable for a wide range of other professions.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook (or other appropriate guide) or online at:
<https://groupsite.soton.ac.uk/Administration/Humanities-Graduate-School/Pages/Employability.aspx> .

Appendix 1:

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Stationery		You will be expected to provide your own day-to-day stationery items, e.g. pens, pencils, notebooks, etc).
Textbooks		Given the specialist nature of doctoral studies there are no specified core texts. You will need access to books and journal articles in the course of your research. These will normally be accessible via the library or Inter Library Loan arrangements. However, you may prefer to buy your own copy of certain books as relevant.
Equipment and Materials Equipment	Field Equipment and Materials:	Fieldwork may involve additional stationery needs and/or travelling equipment. Depending on the nature of your fieldwork, you may require specialist equipment, such as a Dictaphone for recording interviews.
	Laboratory Equipment and Materials:	Laboratory equipment will be provided where available in the department. If new bespoke equipment is required this may be hired or you may need to make a bid to a research council facility for access to specialist equipment. Your supervisor will be able to advise you on the best course of action. You may need to apply to learned societies for small grants to cover access to some specialist facilities that are not supported by a research council scheme.
	Music Equipment and Materials:	Students taking music performance should be aware that they may need to cover the cost of accompanists for performances. Further additional costs may be incurred, typically these may include: replacement strings, reeds, repair of equipment, music scripts etc.
	Photography:	If appropriate for data collection as part of your research you will need to provide your own camera.

	Recording Equipment:	If you plan to conduct qualitative research and record interviews or focus groups, you will need to provide a digital recorder.
	Transcription:	Students who need to transcribe data and who decide not to do this personally will be responsible for the costs of transcription. Those in receipt of research costs from a funding body may be entitled to apply for reimbursement of these charges on production of appropriate receipts.
IT	Computer Discs:	You should keep adequate back-ups of your research data, analyses and writing. You will be responsible for the cost of USB sticks, memory cards and portable hard drives.
	Software Licenses:	Software licenses freely available from the University software list will be provided. You will need to purchase other software not appearing on the list. You may apply to the Humanities PGR Research Fund for a contribution towards this expense.
	Hardware:	All students are provided with a laptop at the beginning of their studies. This must be returned before any award can be made on completion of studies.
Clothing	Fieldwork clothing:	You will need to wear suitable clothing when attending fieldwork, e.g. waterproofs, walking boots. You can purchase these from any source.
Printing and Photocopying Costs		In the majority of cases, coursework such as essays; projects; dissertations is likely to be submitted on line. However, there are some items where it is not possible to submit on line and students will be asked to provide a printed copy. Three soft-bound printed copies of the final thesis are required. A list of the University printing costs can be found here: http://www.southampton.ac.uk/isolutions/students/printing/ :
Fieldwork: logistical costs	Accommodation/Travel Costs/Vaccination Costs:	You will have to meet any costs associated with data collection such as those associated with travel and accommodation. In addition, students collecting data outside of the UK will also be responsible for the costs of any necessary visas, immunisations, medications, translation of birth certificates, clearances etc. Those in receipt of research costs as part of a studentships or fellowship may be entitled to apply for reimbursement of some or all of these charges (up to the annual maximum) on production of appropriate receipts. You will need to cover the costs of these. You can apply to the Humanities Student Research Fund for a financial contribution towards fieldwork costs, travel expenses or conference attendance.. Students are advised to seek other sources of supplemental funding as the funds available from the Graduate School are unlikely to cover all the costs necessary.
	Insurance:	The university provides travel insurance for postgraduate students on university business, including fieldwork. Please refer to the Staff and Postgraduate student travel section on the SUSSED webpages. These are located in the FINANCE section of SUSSED.

Conference expenses	Accommodation & Travel:	Students will need to cover the costs of these. Those not funded by certain studentships can apply to the Humanities Student Research Fund for a nominal sum of money to contribute towards conference attendance.. Students are advised to seek other sources of supplemental funding as the funds available from the Graduate School are unlikely to cover all the costs necessary.
Optional Visits (e.g. museums, galleries)		Some study may include optional visits to a museum, galleries, etc. You will normally be expected to cover the cost of travel and admission, unless otherwise specified.
Parking Costs		Students will be responsible for any parking charges required by the University or incurred during fieldwork or dissemination. Those is receipt of research costs as part of a studentship may be entitled to apply for reimbursement of these charges on production of appropriate receipts. You must cover your own parking costs.
