

Programme Specification

BSc (Hons) Biology: 2020-21

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution	University of Southampton
Teaching Institution	University of Southampton
Mode of Study	Full-time
Duration in Years	3 years, following standard progression for a full-time student
Accreditation details	Not Applicable
Final award	Bachelor of Science – Honours
Name of award	Biology
Interim Exit awards	Bachelor of Science (Ordinary) Diploma of Higher Education Certificate of Higher Education
FHEQ level of final award	6
UCAS code	C100
QAA Subject Benchmark or other external reference	QAA Subject Benchmark Statements for Bioscience (2007) QAA Framework for Higher Education Qualifications (FHEQ)
Programme Lead	Dr Judith Lock 01/08/2015
Date specification was written	2005/2006
Date specification was validated	December 2017
Date specification was last updated	March 2019

Programme Overview

Brief outline of the programme

Biology is the study of living things at all levels – from molecular biology through to cells, individual organisms, populations, species, ecosystems and right up to the global environment. You can select one of 4 optional themed pathways (Cell and Developmental, Molecular, Biodiversity & Ecology or Integrated Biology) depending on where your interests lie. You will undertake a balanced programme where you will gain the relevant skills and knowledge for a career in Biology.

Learning and teaching

A broad range of methods will be employed, including a combination of lectures, tutorials, practical classes, coursework, field-courses and projects. In part 3 you will undertake an independent research project from the range of 15ECTS and 7.5ECTS projects on offer (a total of 15ECTS of project work must be undertaken).

Throughout the programme you are required to undertake independent reading both to supplement and consolidate the taught material and to broaden your knowledge and understanding of biology.

Assessment

Assessment of your knowledge base is through a combination of written examinations and assessed coursework in the form of laboratory and fieldwork practical reports, essays, project reports and presentations.

Please note: As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a student's period of registration. However, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our [Disclaimer](#) to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's [Quality handbook](#).

Educational Aims of the Programme

The aims of the programme are to provide:

1. a stimulating, informed learning environment through a wide range of interesting and contemporary courses, with flexibility of choice, but allowing you to increasingly focus as you progress from level to level;
2. the opportunity to develop a knowledge and understanding of living organisms at several levels of biological organisation ranging from the molecular level, through to cells, whole organisms and ecosystems as well as viewing biology from an evolutionary perspective;
3. an understanding of biological systems and processes in theory and practice;
4. exposure to a range of biological concepts;
5. the opportunity to construct individual programmes of study within a coherent framework, including advanced concepts and techniques in biological topics of your choice;
6. training in relevant laboratory and field work skills;
7. an opportunity to develop a range of transferable skills (information and communication technology, team working, written and oral communication, time management, planning, data collection, analysis and presentation), and the capacity to give a clear and accurate account of the subject;
8. an opportunity for you to develop the ability to think critically and to show that you can pursue independent study;
9. an independent research project on a biological topic;
10. an education and training suitable for a wide variety of careers and to prepare you for higher degrees and careers in biological sciences research;
11. the capability of life-long learning, study and enquiry.

Programme Learning Outcomes

Knowledge and Understanding

Having successfully completed this programme you will be able to:

1. show knowledge and understanding of a range of topics relevant to Biology, as detailed in the LOs for the core and compulsory modules for this programme
2. use a range of practical skills and techniques relevant to Biology, as detailed in the LOs for the core and compulsory modules for this programme
3. utilise methods and experimental designs to address biological problems and questions
4. collect and analyse experimental data
5. interpret and write up the results of experiments
6. create and deliver a presentation on a topic relevant to Biology
7. conduct research into an area of science relevant to Biology
8. produce a dissertation, based on scientific research
9. have an appreciation of the ethical and societal aspects of research in the biosciences

Programme Structure

Typical course content

The programme of study is divided into modules. Each module is assigned a number of credit points (ECTS = European Credit Transfer Scheme) that relates to the hours of formal teaching plus the recommended time for private study (1 ECTS = 20 hours of total student effort). For each part, you will take certain compulsory modules and a selection of approved optional modules to give a minimum of 60 ECTS. A compulsory module is one that you must take (but need not pass, though a minimum of 25% is required for progression) to progress to the next level of study.

From Part 2 onwards, the Biology degree has four recommended pathways: Integrated Biology (IB), Molecular (M), Cell & Development (C/D) and Biodiversity & Ecology (B/E). The pathways are suggested groups of modules whose subject matter cover the pathway themes; you may select your own choice of modules at each level to reflect your development of interests in Biology. The selection of modules is in consultation with your tutor and

must conform to the degree programme regulations and undertaking prerequisite modules for more advanced part 2 and 3 modules.

The Biology degree programme is offered as either a full-time three-year course or part-time. If you wish to pursue this degree by part-time study you will need to take between 15 and 37.5 ECTS each year.

Special Features of the Programme

This programme involves a mandatory field course organised by the university which is held in Spain during the Easter break of part 1. Additionally there is the opportunity to take further optional field course modules in parts 2 and 3 or to carry out field-based project work in part 3.

Programmes and major changes to programmes are approved through the University's [programme validation process](#) which is described in the University's [Quality handbook](#)

Programme details

Part 1 (FHEQ Level 4)

In part 1, students are required to complete eight modules which includes seven compulsory modules.

One further module (total 7.5 ECTS) must be chosen and this can be from outside Biological Sciences.

The modules in Part 1 will provide a sound understanding and knowledge of the fundamental aspects of biological science, covering physiology, molecular, cell biology and genetics.

BIOL1001 Experimental & Field Biology	C
BIOL1003 Ecology and Evolution	C
BIOL1004 Patterns of Life	C
BIOL1005 Cell Biology & Genetics	C
BIOL1010 Macromolecules of Life*	C
BIOL1012 Systems Physiology*	C
BIOL1020 Core Skills in the Life Sciences	C
BIOL1022 Metabolism and Metabolic Disorders	R
BIOL1013 Integrative Mammalian Physiology	R
BIOL1023 Cell & Tissue Histology	R
SOES1006 Elements of Marine Ecology	
SOES1009 The Living Earth	
Other disciplines such as Language, Psychology...	

C=compulsory modules (must take). R=Recommended

*BIOL1010 and BIOL1012 are default compulsory modules but can be substituted by BIOL1007 instead of BIOL1010, and/or BIOL1011 instead of BIOL1012. If you decide at the start of semester 1 to choose either BIOL1022 or BIOL1013 as your elective module then you will have the option, subject to available space, to take BIOL1007 and/or BIOL1011 (which include laboratory practicals) in the first semester instead of the corresponding BIOL1010 and/or BIOL1012 (which have 'dry' computer practicals).

Part 2 (FHEQ Level 5)

In part 2, three modules are compulsory and at least three other BIOL modules should be selected from the list below. Note that BIOL2001 must be *passed* in order to be allowed to take BIOL3010 in part 3; BIOL2008 must be *passed* in order to be allowed to take BIOL3034, BIOL3061, BIOL3062 or BIOL3071 in part 3.

Compulsory
BIOL2001 Evolution
BIOL2007 Plant Development and Function
BIOL2008 Quantitative Methods in Biological & Environmental Science
Recommended
BIOL2002 Cell Biology
BIOL2003 Animal Reproduction and Development
BIOL2004 Pure and Applied Population Ecology
BIOL2010 Flow of Genetic Information

BIOL2011 Molecular & Cellular Biochemistry
BIOL2012 Exploring Proteins: Structure and Function
BIOL2013 Bioinformatics and DNA technology
BIOL2014 Neuroscience
BIOL2018 Adaptive Physiology
BIOL2038 Microbiology – from the natural environment to disease
BIOL2039 Animal Behaviour
BIOL2041 New Forest Field Course
Biol2043 Biotechnology & the Living Cell
BIOL2044 Medical Microbiology
BIOL2022 Immunology Infection and Inflammation
BIOL2047 Animal Conservation
SOES2006 Phytoplankton and Primary Production
SOES2017 Ecological Processes in the Marine Benthos
SOES2032 Palaeobiology
Additional modules may be selected to make 60 ECTS

C=compulsory modules (must take). R = Recommended.

A maximum of two modules can be taken from outside Biological Sciences and of these not more than one can be a UOSM coded module.

BIOL2042 Biological Sciences Study Abroad. There is an opportunity to carry out studies during semester 2 of part 2 at one of several partner universities in Australia or New Zealand. Specific module choices available will be dependent on the university selected and further information should be obtained from the module coordinator.

Part 3 (FHEQ Level 6)

In part 3 you will undertake at least 15 ECTS of compulsory independent study. You will be offered the choice of the following 15 ECTS modules

Laboratory research project BIOL3034

Field research project BIOL3061

Bioscience Business BIOL3058

Bioscience Education BIOL3059

In-silico research project BIOL3069

External Research Project BIOL3071

Alternatively a combination of two 7.5 ECTS modules may be chosen from the selection below, with one module to be completed in each semester

Short field project BIOL3062 (semester 1)

Science communication BIOL3060 (semester 1)

Literature-based research project BIOL3031 (semester 1)

Bioethics research project BIOL3073 (semester 2)

Literature-based research project BIOL3032 (semester 2)

Extended Science communication BIOL3066 (semester 2)*

*BIOL3060 is an essential prerequisite in order to take BIOL3066.

It is not permitted to take both BIOL3031 and BIOL3032

All other modules must be selected from the following list: with up to a maximum of two being taken outside the Centre for Biological Science (e.g. Environmental Sciences (ENVS) modules, Oceanography (SOES) modules, Psychology (PSYC) modules).

BIOL3001 Current Topics in Cell and Developmental Biology
BIOL3003 Plant Cell Biology
BIOL3056 Global Change Biology: Molecules to Ecosystem Services
BIOL3006 Cellular and Genetic Aspects of Animal Development
BIOL3053 Biodiversity & Conservation
BIOL3009 Applied Ecology
BIOL3010 Topics in Ecology and Evolution
BIOL3013 Molecular Recognition
BIOL3014 Molecular Cell Biology

BIOL3015 Regulation of Gene Expression
BIOL3017 The Molecular & Structural Basis of Disease
BIOL3018 Molecular Pharmacology
BIOL3052 Biomedical Technology
BIOL3020 Systems Neuroscience
BIOL3021 Cellular & Molecular Neuroscience
BIOL3022 Cell Signalling in Health and Disease
BIOL3025 Neuropharmacology of CNS Disorders
BIOL3027 Selective Toxicity
BIOL3037 Immunology
BIOL3048 Neurodegenerative Disease
BIOL3051 Applied Plant Biology
BIOL3057 Biofilms & Microbial Communities
BIOL3063 Bioinformatics & Systems Biology
BIOL3064 Cancer and Chromosome Biology
BIOL3065 Biomedical Parasitology
BIOL3067 Evolution & Development
BIOL3068 Fluxes Cycles & Microbial Communities
BIOL3070 Tropical Ecology Field Course
Additional modules may be selected to make 60 ECTS

A maximum of 2 modules can be taken from outside Biological Sciences and of these not more than one can be a UOSM coded module.

Revision of the contents of the programme is made periodically to reflect developments at the frontiers of biology.

BSc Biology with a 'Minor' subject

The structure of your degree programme allows you to exercise choice in each year of study. You can exercise this choice in a number of ways.

- You can use these modules to deepen your knowledge of your main subject.
- You can combine additional modules from your main subject with modules from the other disciplines or choose from a selection of interdisciplinary modules.
- You can choose modules that build into a minor pathway, the title of which will be included in your degree transcript.

Details of the minors available and the modules that are included can be found at http://www.southampton.ac.uk/cip/information_for_students/minor_subjects/index.page?

Progression Requirements

The programme follows the University's regulations for [Progression, Determination and Classification of Results: Undergraduate and Integrated Masters Programmes](#) as set out in the University Calendar (<http://www.calendar.soton.ac.uk/>).

Those specific to the Faculty, the Academic Unit and your programme are in Section IX – Faculty of Natural and Environmental Sciences, <http://www.calendar.soton.ac.uk/sectionIX/sectIX-index.html>.

Intermediate exit points

You will be eligible for an interim exit award if you complete part of the programme but not all of it, as follows:

Qualification	Minimum overall credit in ECTS credits	Minimum ECTS Credits required at level of award
BSc Ordinary degree	at least 150	30
Diploma of Higher Education	at least 120	45
Certificate of Higher Education	at least 60	45

If you successfully complete Part 1 you may switch to the degree programme in Zoology or Ecology.

Learning outcomes specific to each intermediate exit point correspond to a sub-set of those for the programme as a whole and may be determined by consulting the module map at the end of this document.

Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:

- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources;
- high speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure filestore and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library;
- Enabling Services offering support services and resources via a triage model to access crisis management, mental health support and counselling.
- assessment and support (including specialist IT support) facilities if you have a disability, long term health problem or Specific Learning Difficulty (e.g. dyslexia);
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards;
- Career Destinations, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV;
- Other support that includes health services (GPs), chaplaincy (for all faiths) and 'out of hours' support for students in Halls (18.00-08.00); a Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Students' Union provides

- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students' views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

We aim to provide a friendly and supportive environment for you to pursue your studies. You will have a personal academic tutor to offer general help, advice and encouragement on academic and pastoral matters throughout your undergraduate career.

Associated with your programme you will be able to access:

- An induction programme at the start of the course, which will provide orientation, information on modules, courses, library and computer facilities.
- Programme handbooks, module handbooks and material on the web.
- Library and academic skill packages.
- Well-equipped laboratories.
- Academic and pastoral support from members of staff, including your personal academic tutor which will include scheduled meetings at appropriate occasions during the academic year.

- Access to all administrative and academic material on the CBS, Programme and individual module web sites and/or Blackboard (<http://www.blackboard.soton.ac.uk>).
- Access to academic staff through an appointment system and e-mail.
- Access to administrative staff in the Faculty Student Offices during the normal working day.
- Feedback on assessment.

Methods for evaluating the quality of teaching and Learning

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing student evaluation questionnaires for each module of the programme
- Acting as a student representative on various committees, e.g. Staff: Student Liaison Committees, Faculty Education Committee OR providing comments to your student representative to feedback on your behalf.
- Serving as a student representative on Faculty Scrutiny Groups for programme validation
- Taking part in programme validation meetings by joining a panel of student to meet with the Faculty Scrutiny Group

The ways in which the quality of your programme is checked, both inside and outside the University, are:

- Regular module and programme reports which are monitored by the School.
- Programme validation, normally every five years.
- External examiners, who produce an annual report
- A national Teaching Excellence Framework and also Research Excellence Framework (our research activity contributes directly to the quality of your learning experience)
- Institutional Review by the Quality Assurance Agency
- The Academic Unit of Biological Sciences has an Education Executive that monitors and evaluates all aspects of learning and teaching at undergraduate level. It considers the results of student feedback and takes appropriate action to remedy any shortcomings. The Director of Programmes acts on the results of peer observation of teaching and reports from our External Examiners who are selected from comparator universities.

Further details on the University's quality assurance processes are given in the [Quality Handbook](#).

Criteria for admission

The University's Admissions Policy (see www.southampton.ac.uk/admissions-policy) applies equally to all programmes of study. The following are the typical entry criteria we use for selecting candidates for admission to our programmes.

Entry Requirements

These requirements are reviewed annually by our Admissions team. Those stated below were correct as of July 2019.

GCSEs:

We require grades A-C in English, Mathematics and Science. If you lack these formal qualifications, your aptitude for the course will be assessed at interview. International students, whose first language is not English, must have already attained the necessary standard in English – see English Language Proficiency section below.

A Levels:

AAB (excluding general studies)

Biology must be offered at A-level along with at least one other A-level science subject

A-level Science subjects considered include:

A-level	Biology (minimum grade B)
Other science A-levels	Chemistry Physics Mathematics

	Psychology Environmental Science Geology Geography
--	---

Alternative Qualifications

Our admissions requirement is normally defined on the basis of A/AS levels, but equivalent qualifications are accepted.

We also offer entry through a one year Science Foundation programme designed to enable you to qualify for entry to Honours degree programmes in Biological Sciences if you have not studied the appropriate Science subjects at GCE A level or equivalent standard. It is particularly appropriate if you are a mature student or if you have obtained good grades in non-science A-levels.

We will also accept applications from candidates offering other equivalent qualifications including Scottish and Irish Highers, European and International Baccalaureate, Access and Foundation courses and overseas qualifications.

More information on the entry requirements for Biology can be found on the Biology webpage here - <http://www.southampton.ac.uk/undergraduate/courses/biology.shtml>

English Language Proficiency

All programmes at the University of Southampton are taught and assessed in the medium of English (other than those in modern foreign languages). Therefore, all applicants must demonstrate they possess at least a minimum standard of English language proficiency. Our minimum standard entry requirements are an IELTS Band C, i.e.

Overall	Reading	Writing	Speaking	Listening
6.5	5.5	5.5	5.5	5.5

Information on all acceptable English Language Tests can be found on the University website: www.southampton.ac.uk/admissions-language

Recognition of Prior Learning (RPL)

The University has a Recognition of Prior Learning Policy. It may be possible to recognise formal credit for learning you have acquired in the past through formal study and/or through work and other life experiences. Your application will be considered on individual merit and you may be asked to attend an interview.

Mature applicants:

Studying for a degree later in life can be extremely rewarding and mature students are often among our most successful.

If you are over 21 and feel you would benefit from degree-level studies, we can be more flexible about our entry requirements. For full-time courses, selectors will expect you to demonstrate your commitment by means of some recent serious study, for example, one or two A level passes, successful completion of an Open University foundation course or an appropriate Access course. Your application will be considered on individual merit and you may be asked to attend an interview.

Another popular option is to follow a certificate or diploma programme. These are available on a part time basis and most can be taken in the evenings, enabling you to continue to earn an income while you are studying.

Career Opportunities

With a BSc Biology degree you could be expected to find work in the following areas:

- Postgraduate degrees
- Teacher training
- Medicine

- Conservation and the environment
- Agriculture
- Industry
- Journalism

External Examiners(s) for the programme

Name Prof. Claire Grierson
Institution. University of Bristol

Name Dr Sebastian Shimeld
Institution. University of Oxford

Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their personal tutor in the first instance.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below

In some cases you'll be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University's Fees, Charges and Expenses Regulations in the University Calendar available at <http://www.calendar.soton.ac.uk/>.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Approved Calculators		Candidates may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers
Stationery		You will be expected to provide your own day-to-day stationary items, e.g. pens, pencils, notebooks, etc. Any specialist stationery items will be specified under the Additional Costs tab of the relevant module profile.
Textbooks		Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source. Some modules suggest reading texts as optional background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.
Equipment and Materials	Laboratory and Field Equipment and Materials:	All materials required for laboratory or field work are provided. Where necessary, suitable specialist safety equipment will be provided.
IT	Computer Discs or USB drives	Students are expected to provide their own portable data storage device.
	Software Licenses	All software is provided
	Hardware	It is advisable that students provide their own laptop or personal computer, although shared facilities are available across the University campus.
Clothing	Lab Coats and safety spectacles	One laboratory coat and a pair of safety spectacles are provided at the start of the programme to each student. If these are lost the student must replace them at their own expense. The Students Union Shop stock these items.
	Field course clothing	You will need to wear suitable clothing when attending field courses, e.g. waterproofs, walking boots. You can purchase these from any source.
Printing and Photocopying Costs		Coursework such as essays; projects; dissertations may be submitted on line. In the majority of cases, though, students will be asked to provide a printed copy. The University printing costs are currently:

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
		<p>A4 - 4p per side (black and white) or 18p per side (colour) A3 - 8p per side (black and white) or 35p per side (colour)</p> <p>Please Note: Paper sizes not recognised by the printing devices will prompt you to select the size and then charge a minimum of 50p per black and white copy and a maximum of £1 per colour copy.</p> <p>You can pay for your printing by using the money loaders or by using print copy payment service by going to www.printcopypayments.soton.ac.uk Please remember that we are unable to refund any credit that has not been used by the end of your course, so please consider this when topping up your printing/copy account</p> <p>Students entering Year 1 in 2015/16 will be given a printing allowance of £3 per 7.5 ECTS BIOL towards the costs of printing lecture handouts (except BIOL1001 as there is nothing to print out). Practical handouts and module guides will be provided by the university.</p> <p>The University Print Centre also offers a printing and copying service as well as a dissertation/binding service. Current printing and copying costs can be found here. They also provide a large format printing service, e.g. Academic posters. Details of current costs can be found here.</p>
Fieldwork: Logistical costs	Accommodation:	<p>For <i>compulsory</i> residential fieldcourses accommodation and travel are normally provided though where necessary, you will be expected to cover the cost of getting to and from the departure point which may be an airport. You are usually expected to cover the costs of food and drink, although some courses may include meals.</p> <p>For <i>optional</i> fieldcourses, you may be asked to make a contribution to the travel and/or accommodation costs.</p> <p>Undergraduates are automatically covered under the University's travel insurance whilst on organised and supervised fieldcourses. Those travelling independently in connection with their programme can be included under the University's travel insurance upon application - there may be a cost attached to this.</p> <p>There are also opportunities to undertake fieldcourses with another organisation, e.g. Operation Wallacea - for example see here. Where necessary students will need to arrange and pay for any vaccinations.</p> <p>Specific details on what additional costs there are detailed in the individual module profiles which can be found under the modules tab of the programmes details of the relevant academic unit.</p>
	Insurance (travel/health):	
	Travel Costs:	
	Immunisation/vaccination costs:	
	Other:	
Placements (including Industrial Year out)		<p>Students who choose to go on an industrial placement at the end of Part 2 can expect to cover costs for health and travel insurance, accommodation and living expenses; travel costs; visa costs.</p>

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
		This will vary depending on which country you are travelling to.
Parking Costs		There may be a requirement to undertake work at Southampton General Hospital (SGH), for example during a final year research project. Students may need to cover costs for transport to travel to SGH or for car parking.
Other	Travel Costs	Students who opt to undertake a module delivered at Marwell Wildlife will be responsible for their own travel expenses.

Revision History

1. Minor revisions (including title) 10 July 2007 (SCK)
2. New Brand added July 2008
3. Updated to reflect University restructuring June 2011 AB.
4. Revisions approved by Senate 19 June 2013 as part of new programme validation process
5. Minor changes made to form guidance on completion of Intended Learning Outcomes, and Learning outcomes and Assessment Mapping document template, for clarity; and changes to wording of support for student learning section, altering to second person throughout – agreed with the Chair and to be reported to UPC October 2013
6. Academic Year 2013/14 Version updated CQA
7. Updated to take account of new Programme Specification template, September 2015
8. Minor revisions April 2019
