

# Programme Specification

---

## Integrated Masters in Zoology: 2020-21

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided.

Awarding Institution	University of Southampton
Teaching Institution	University of Southampton
Mode of Study	Full-time
Duration in Years	4 years, following standard progression for a full-time student
Accreditation details	Not Applicable
Final award	Integrated Masters (MSci)
Name of award	Zoology
Interim Exit awards	Bachelor of Science (Honours) Bachelor of Science (Ordinary) Diploma of Higher Education Certificate of Higher Education
FHEQ level of final award	7
UCAS code	C301
QAA Subject Benchmark or other external reference	QAA Subject Benchmark Statements for Bioscience (2007) QAA Framework for Higher Education Qualifications (FHEQ) QAA Masters Degree Characteristics
Programme Lead	Dr N Gostling
Date specification was written	23/01/2015
Date specification was validated	December 2017
Date specification was last updated	March 2019

## Programme Overview

---

### Brief outline of the programme

Zoology is the branch of biology dealing with the study of the structure, molecular and cell biology, development, ecology, evolution and classification of animals. At Southampton our expertise stretches from evolution and behaviour to gene regulation, neuroscience and development in a range of animals. Our links with institutions undertaking zoological research enables us to integrate their expertise within the MSci Zoology degree; for example with Marwell Zoological Park and Southampton General hospital are both used in the undergraduate programme. Opportunities exist to undertake Part 3 and Part 4 research projects at these or many other sites.

### Learning and teaching

A broad range of methods will be employed, including a combination of lectures, tutorials, practical classes, coursework and field-courses in parts 1, 2 and 3. The part 1 field course (BIOL1001) is compulsory, takes place in Spain during the Easter break and lasts approximately one week. Optional field courses can be chosen in part 2 (BIOL2041 New Forest field course) and part 3 (BIOL3070 Tropical Ecology Field course). In Part 3 you will undertake an in-depth research project in the laboratory or field and the skills gained will be built upon via an extended research project in part 4.

Throughout the programme you are required to undertake independent reading both to supplement and consolidate the taught material and to broaden your knowledge and understanding of zoology.

### Assessment

Assessment of your knowledge base is through a combination of written examinations and assessed coursework in the form of laboratory and fieldwork practical reports, essays and project reports and presentations.

**Please note:** As a research-led University, we undertake a continuous review of our programmes to ensure quality enhancement and to manage our resources. As a result, this programme may be revised during a

student's period of registration. However, any revision will be balanced against the requirement that the student should receive the educational service expected. Please read our [Disclaimer](#) to see why, when and how changes may be made to a student's programme.

Programmes and major changes to programmes are approved through the University's programme validation process which is described in the University's [Quality Handbook](#).

## **Educational Aims of the Programme**

---

The aims of the Zoology degree programme are to provide:

1. a stimulating, informed learning environment through a wide range of interesting and contemporary modules, with flexibility of choice, but allowing you to increasingly focus as you progress from level to level;
2. the opportunity to develop a knowledge and understanding of living organisms at several levels of biological organisation ranging from the molecular level, through to cells, whole organisms and ecosystems as well as viewing zoology from an evolutionary perspective;
3. an understanding of biological systems and processes in theory and practice;
4. exposure to a range of zoological concepts;
5. the opportunity to construct individual programmes of study within a coherent framework, including advanced concepts and techniques in zoological topics of your choice;
6. training in relevant laboratory and field work skills;
7. an opportunity to develop a range of transferable skills (information and communication technology, team working, written and oral communication, time management, planning, data collection, analysis and presentation), and the capacity to give a clear and accurate account of the subject;
8. an opportunity for you to develop the ability to think critically and to show that you can pursue independent study;
9. an independent research project on a zoological topic;
10. an education and training suitable for a wide variety of careers and to prepare you for higher degrees and careers in biological sciences research;
11. the capability of life-long learning, study and enquiry.

The main aims of the MSci Zoology degree are:

12. develop the advanced ability to formulate, design and implement a programme of research to address a specific question in zoology using appropriate data analysis
13. have skills required to undertake a research project producing results that have the potential to form part of a peer reviewed scientific publication
14. ability to assimilate, evaluate and present research results objectively
15. develop your ability to adapt and apply methodologies to the solution of zoological questions
16. be familiar with a range of topics at the cutting edge of Biological Sciences research via seminars and other forms of scientific presentation.
17. Develop specialised skills applicable in academic or industrial contexts.

## **Programme Learning Outcomes**

---

### **Knowledge and Understanding**

Having successfully completed this programme you will be able to:

- A1. show knowledge and understanding of a range of topics relevant to Zoology, as detailed in the LOs for the core and compulsory modules for this programme
- A2. use a range of practical skills and techniques relevant to Zoology, as detailed in the LOs for the core and compulsory modules for this programme
- A3. utilise methods and experimental designs to address zoological problems and questions
- A4. collect and analyse experimental data
- A5. interpret and write up the results of experiments
- A6. create and deliver a presentation on a topic relevant to Zoology
- A7. conduct research into an area of science relevant to Zoology
- A8. produce a dissertation, based on scientific research

- A9. have an appreciation of the ethical and societal aspects of research in the biosciences
- A10. critically evaluate published research
- A11. conduct an in-depth piece of scientific research, evidenced by a substantial dissertation

### ***Teaching and Learning Methods***

Taught material will be delivered using lectures, tutorials, laboratory and field based practicals and projects. Further self-learning through additional reading and research is expected. In addition to the methods described above, analysis and problem solving are further developed in tutorials and laboratory practicals. Practical and research skills are further developed through laboratory work and projects. You will be helped to acquire these skills through aspects of the formal teaching programme. In the early years this will mainly be through tutorial and coursework, whilst in part three your project work will enable you to further develop and practice many of the individual skills in one major activity.

### ***Assessment methods***

Experimental and research skills are assessed through some or all of the following: laboratory reports, project reports and presentations, final year research project or dissertations. Analysis and problem solving skills are assessed through unseen written examinations, continual assessment, practical write-ups and computer-based exercises. Experimental and research skills are assessed through some or all of the following: laboratory reports, project reports and presentations, final year research project or dissertations.

## **Programme Structure**

---

### **Typical course content**

The programme of study is divided into modules. Each module is assigned a number of credit points (ECTS = European Credit Transfer Scheme) that relates to the hours of formal teaching plus the recommended time for private study (1 ECTS = 20 hours of total student effort). In each Part you will take certain compulsory modules and a selection of approved optional modules to give a minimum of 60 ECTS. This degree is offered as either a full-time four-year course or for study part-time. If you wish to pursue this degree by part-time study you will need to take between 15 ECTS and 37.5 ECTS each year.

From Part 2, the MSci Zoology degree has three recommended pathways: General (G), Cell & Development (C/D) and Ecology & Evolution (E/E). The pathways are suggested groups of modules whose subject matter cover the pathway themes; you may select your own choice of modules at each level to reflect your development of interests in Zoology. The selection of modules is in consultation with your tutor and must conform to the degree programme regulations and undertaking prerequisite modules for more advanced Part 3 and 4 modules.

### **Special Features of the Programme**

This programme involves a mandatory field course organised by the university which is held in Spain during the Easter break of part 1. Additionally there is the opportunity to take a further optional field course module in part 2 (New Forest field course) and/or part 3 (Tropical Ecology Field course in Belize) or to carry out field-based project work in parts 3 and 4.

Our links with institutions undertaking zoological research enables us to integrate their expertise within the Zoology degree; for example Marwell Zoological Park and Southampton General hospital are both used in the undergraduate programme. Opportunities exist to undertake parts 3 and 4 research projects at these or many other sites.

The option modules shown below constitute an indicative list; there will always be choice but the options might vary between years. A full list of modules and rules will be available to you via the Student Record Self-Service system once you enrol at the University.

## **Programme details**

### **Part 1 (FHEQ Level 4)**

In part 1, students are required to complete eight modules which includes seven compulsory modules.

One further module (total 7.5 ECTS) must be chosen and this can be from outside Biological Sciences - modules with a zoological emphasis are encouraged.

The modules in Part 1 will provide a sound understanding and knowledge of the fundamental aspects of biological science, covering physiology, molecular, cell biology and genetics and a solid introduction to zoology.

<b>BIOL1001 Experimental &amp; Field Biology</b>	<b>C</b>
<b>BIOL1003 Ecology and Evolution</b>	<b>C</b>
<b>BIOL1004 Patterns of Life</b>	<b>C</b>
<b>BIOL1005 Cell Biology &amp; Genetics</b>	<b>C</b>
<b>BIOL1010 Macromolecules of Life</b>	<b>C</b>
<b>BIOL1012 Systems Physiology</b>	<b>C</b>
<b>BIOL1020 Core Skills in Life Sciences</b>	<b>C</b>
BIOL1022 Metabolism & Metabolic Disorders	R
BIOL1013 Integrative Mammalian Physiology	R
BIOL1023 Cell & Tissue Histology	R
SOES1006 Introduction to Marine Ecology	
SOES1009 The Living Earth	
Other disciplines such as Language, Psychology...	

*C=compulsory modules (must take) R=Recommended*

The BIOL1001 Experimental & Field Biology module takes place in southern Spain during the Easter break of part 1 and lasts for around 8 days.

## Part 2 (FHEQ Level 5)

In Part 2, five modules are compulsory, and a sixth compulsory module must be taken from a choice of two. Note that BIOL2001 must be passed in order to be allowed to take BIOL3010 in Part 3; BIOL2003 must be passed in order to be allowed to take BIOL3006 in Part 3; BIOL2008 must be passed in order to be allowed to take BIOL3034, BIOL3061, BIOL3062, BIOL3069 or BIOL3071 in Part 3.

	Pathway		
	General	Cell/Dev	Eco/Evo
<b>BIOL2001 Evolution</b>	<b>C</b>	<b>C</b>	<b>C</b>
<b>BIOL2008 Quantitative Methods in Biological &amp; Environmental Science</b>	<b>C</b>	<b>C</b>	<b>C</b>
<b>BIOL2039 Animal Behaviour</b>	<b>C</b>	<b>C</b>	<b>C</b>
<b>BIOL2045 Vertebrate Development</b>	<b>C</b>	<b>C</b>	<b>C</b>
<b>SOES2011 Marine Vertebrates</b>	<b>C</b>	<b>C</b>	<b>C</b>
BIOL2018 Adaptive Physiology	(C)	(C)	(C)
BIOL2040 Neural Basis of Behaviour	(C)	(C)	(C)
Additional modules may be selected from :			
BIOL2002 Cell Biology	R	R	
BIOL2004 Pure and Applied Population Ecology	R		R
BIOL2007 Plant Development and Function			
BIOL2010 Flow of Genetic Information			
BIOL2011 Molecular & Cell Biochemistry			
BIOL2012 Exploring Proteins: Structure and Function			
BIOL2013 Bioinformatics and DNA technology			
BIOL2014 Neuroscience		R	
BIOL2022 Immunology, Infection and Inflammation	R	R	
BIOL2038 Microbiology	R		
BIOL2041 New Forest Field Course	R		R
BIOL2043 Biotechnology & the Living Cell	R	R	
BIOL2044 Medical Microbiology	R	R	
BIOL2047 Animal Conservation			R
SOES2017 Ecological Processes in the Marine Benthos			
<i>Additional modules must be selected to make 60ECTS</i>			

*C=compulsory modules (must take); (C) at least one of these modules must be taken; R = Recommended*

A maximum of 2 modules can be taken from outside Biological Sciences and of these not more than one can be a UOSM coded module.

**BIOL2042 Biological Sciences Study Abroad.** There is an opportunity to carry out studies during semester 2 of year 2 at one of several partner universities in Australia or New Zealand. Specific module choices available will be dependent on the university selected and further information should be obtained from the module coordinator.

Progression to Part 3 is dependent on obtaining a minimum of 60% overall in the Part 2 assessment. If you do not achieve the progression mark, you will have to option to transfer onto the BSc programme.

### Part 3 (FHEQ Level 6)

In Part 3 students will undertake at least 15 ECTS of independent study which should be focussed on a zoological topic. You will be offered the choice of the following 15 ECTS modules or combination of two 7.5ECTS modules:

- i) BIOL 3034 Laboratory research project (15 ECTS)
- ii) BIOL3061 Field research project (15 ECTS)
- iii) BIOL3069 *In-silico* research project (15 ECTS)
- iv) BIOL3071 External Research project (15 ECTS)
- v) BIOL3062 Short field project (7.5 ECTS semester 1) plus BIOL3032 Literature-based research project (7.5 ECTS semester 2)
- vi) BIOL3062 Short field project (7.5 ECTS semester 1) plus BIOL3073 Bioethics research project (7.5 ECTS semester 2)

A minimum of a further 4 Zoology (Z) designated modules (30 ECTS) need to be chosen from the table below.

### Zoology (Z) modules

	Pathway		
	General	Cell/Dev	Eco/Evo
BIOL3001 Current Topics in Cell and Developmental Biology	R	R	
BIOL3009 Applied Ecology	R		R
BIOL3010 Topics in Ecology and Evolution	R		R
BIOL3020 Systems Neuroscience	R	R	
BIOL3021 Cellular & Molecular Neuroscience	R	R	
BIOL3053 Biodiversity & Conservation	R		R
BIOL3056 Global Change Biology	R		R
BIOL3067 Evolution & Development	R	R	R
BIOL3070 Tropical Ecology Field Course	R		R

Two other optional modules can be selected from those shown in the table below or from outside Biological Sciences to make the required number of ECTS.

	General	Cell/Dev	Eco/Evo
BIOL3003 Plant Cell Biology	R	R	
BIOL3012 Cell Membranes	R	R	
BIOL3013 Molecular Recognition	R		
BIOL3014 Molecular Cell Biology	R	R	
BIOL3015 Regulation of Gene Expression	R		
BIOL3017 The Molecular & Structural Basis of Disease	R		
BIOL3018 Molecular Pharmacology	R		
BIOL3052 Biomedical Technology	R		
BIOL3022 Cell Signalling in Health and Disease	R	R	
BIOL3025 Neuropharmacology of CNS Disorders	R	R	
BIOL3027 Selective Toxicity	R		
BIOL3037 Immunology	R		
BIOL3048 Neurodegenerative Disease	R		
BIOL3051 Applied Plant Biology	R		
BIOL3057 Biofilms & Microbial Communities	R		R
BIOL3063 Bioinformatics & Systems Biology	R		
BIOL3064 Cancer and Chromosome Biology	R		
BIOL3065 Biomedical Parasitology	R		
BIOL3068 Fluxes Cycles & Microbial Communities	R		R

A maximum of 2 modules can be taken from outside Biological Sciences and of these not more than one can be a UOSM coded module.

Revisions of the contents of the programmes for Part 3 are made periodically to reflect developments at the frontiers of zoology.

#### Part 4 (FHEQ Level 7)

In Part 4 you will undertake a compulsory research project from the options below.

BIOL6013 Advanced Laboratory Research Project (30 ECTS)
BIOL6069 Advanced Field Research Project (30 ECTS)

The compulsory modules annotated “C” in the following table must be taken together with one module annotated “(C)”.

	Pathway		
	General	Cell/Dev	Eco/Evo
BIOL6053 Current Research (7.5 ECTS)	C	C	C
BIOL6073 Critical Thinking (3.75ECTS)	C	C	C
BIOL6055 Computational Methods for Biological Data Analysis (3.75 ECTS)	(C)	(C)	(C)
BIOL6075 Biological Optical Imaging (3.75 ECTS)	(C)	(C)	(C)
BIOL6082 Skills in Biomolecular NMR (3.75ECTS)	(C)	(C)	(C)
BIOL6083 Skills in Optical Spectroscopy (3.75ECTS)	(C)	(C)	(C)

C=compulsory modules (must take); (C) = one of these options must be taken;

Two modules must be selected from the table below or from modules available from outside the Centre for Biological Science provided they are relevant to Zoology.

[NB When choosing these option modules, please note that it cannot be the 6XXX equivalent of an 3XXX module already taken in part 3]

	Pathway		
	General	Cell/Dev	Eco/Evo
BIOL6010 Applied Ecology	R		R
BIOL6021 Current Topics in Cell Biology	R	R	
BIOL6025 Cellular and Genetic Aspects of Animal Development	R	R	
BIOL6028 Global Change Biology	R		R
BIOL6029 Topics in Ecology and Evolution	R		R
BIOL6034 Systems Neuroscience	R	R	
BIOL6035 Cellular & Molecular Neuroscience	R	R	
BIOL6052 Advanced Quantitative Methods			
BIOL6066 Spatial Ecology & Conservation	R		R

R = recommended

Revisions of the contents of the programmes for Part 4 are made periodically to reflect developments at the frontiers of biology.

### MSci Zoology with a ‘Minor’ subject

The structure of your degree programme allows you to exercise choice in each part of study. You can exercise this choice in a number of ways.

- You can use these modules to deepen your knowledge of your main subject.
- You can combine additional modules from your main subject with modules from the other disciplines or choose from a selection of interdisciplinary modules.
- You can choose modules that build into a minor pathway, the title of which will be included in your degree transcript.

Details of the minors available and the modules that are included can be found at [http://www.southampton.ac.uk/cip/information\\_for\\_students/minor\\_subjects/index.page?](http://www.southampton.ac.uk/cip/information_for_students/minor_subjects/index.page?)

## Progression Requirements

The University regulations governing progression, determination and classification of results in general can be found in the University Calendar (Section IV – General Regulations)  
<https://www.southampton.ac.uk/calendar/sectioniv/index.page>

Those specific to the Faculty and your programme are in the University Calendar –  
<http://www.calendar.soton.ac.uk>

## Intermediate exit points

You will be eligible for an interim exit award if you complete part of the programme but not all of it, as follows:

Qualification	Minimum overall credit in ECTS credits	Minimum ECTS Credits required at level of award
BSc Honours degree	At least 180	45
BSc Ordinary degree	at least 150	30
Diploma of Higher Education	at least 120	45
Certificate of Higher Education	at least 60	45

If you successfully complete part one you may switch to the degree programme in Zoology, Biology, Ecology & Conservation, MSci Biology or MSci Ecology & Conservation.

Learning outcomes specific to each intermediate exit point correspond to a sub-set of those for the programme as a whole and may be determined by consulting the module map at the end of this document.

## Support for student learning

There are facilities and services to support your learning some of which are accessible to students across the University and some of which will be geared more particularly to students in your particular Faculty or discipline area.

The University provides:

- library resources, including e-books, on-line journals and databases, which are comprehensive and up-to-date; together with assistance from Library staff to enable you to make the best use of these resources
- high speed access to online electronic learning resources on the Internet from dedicated PC Workstations onsite and from your own devices; laptops, smartphones and tablet PCs via the Eduroam wireless network. There is a wide range of application software available from the Student Public Workstations.
- computer accounts which will connect you to a number of learning technologies for example, the Blackboard virtual learning environment (which facilitates online learning and access to specific learning resources)
- standard ICT tools such as Email, secure filestore and calendars.
- access to key information through the MySouthampton Student Mobile Portal which delivers timetables, Module information, Locations, Tutor details, Library account, bus timetables etc. while you are on the move.
- IT support through a comprehensive website, telephone and online ticketed support and a dedicated helpdesk in the Hartley Library.
- Enabling Services offering support services and resources via a triage model to access crisis management, mental health support and counselling. Support includes daily Drop In at Highfield campus at 13.00 – 15.00 (Monday, Wednesday and Friday out of term-time) or via on-line chat on weekdays from 14.00 – 16.00. Arrangements can also be made for meetings via Skype.
- assessment and support (including specialist IT support) facilities if you have a disability, long term health problem or Specific Learning Difficulty (e.g. dyslexia).
- the Student Services Centre (SSC) to assist you with a range of general enquiries including financial matters, accommodation, exams, graduation, student visas, ID cards
- Career and Employability services, advising on job search, applications, interviews, paid work, volunteering and internship opportunities and getting the most out of your extra-curricular activities alongside your degree programme when writing your CV
- Other support that includes health services (GPs), chaplaincy (for all faiths) and 'out of hours' support for students in Halls and in the local community, (18.00-08.00)
- A Centre for Language Study, providing assistance in the development of English language and study skills for non-native speakers.

The Students' Union provides

- an academic student representation system, consisting of Course Representatives, Academic Presidents, Faculty Officers and the Vice-President Education; SUSU provides training and support for all these representatives, whose role is to represent students' views to the University.
- opportunities for extracurricular activities and volunteering
- an Advice Centre offering free and confidential advice including support if you need to make an academic appeal
- Support for student peer-to-peer groups, such as Nightline.

We aim to provide a friendly and supportive environment for you to pursue your studies. You will have a personal academic tutor to offer general help, advice and encouragement on academic and pastoral matters throughout your undergraduate career.

Associated with your programme you will be able to access:

- An induction programme at the start of the course, which will provide orientation, information on modules, courses, library and computer facilities.
- Programme handbooks, module handbooks and material on the web.
- Library and academic skill packages.
- Well-equipped laboratories.
- Academic and pastoral support from members of staff, including your academic tutor which will include scheduled meetings at appropriate occasions during the academic year.
- Access to all administrative and academic material on the CBS, Programme and individual module web sites and/or Blackboard (<http://www.blackboard.soton.ac.uk>).
- Access to all academic staff through an appointment system and e-mail.
- Access to administrative staff in the Faculty Student Offices during the normal working day.
- Feedback on assessment.

## Methods for evaluating the quality of teaching and learning

---

You will have the opportunity to have your say on the quality of the programme in the following ways:

- Completing student evaluation questionnaires for each module of the programme
- Acting as a student representative on various committees, e.g. Staff/Student Liaison Committees, Faculty Education Committee OR providing comments to your student representative to feed back on your behalf.
- Serving as a student representative on Faculty Scrutiny Groups for programme validation
- Taking part in programme validation meetings by joining a panel of student to meet with the Faculty Scrutiny Group

The ways in which the quality of your programme is checked, both inside and outside the University, are:

- Regular module and programme reports which are monitored by the School
- Programme validation, normally every five years.
- External examiners, who produce an annual report
- A national Research Excellence Framework (our research activity contributes directly to the quality of your learning experience)
- Institutional Review by the Quality Assurance Agency
- The Academic Unit of Biological Sciences has an Education Executive that monitors and evaluates all aspects of learning and teaching at undergraduate level. It considers the results of student feedback and takes appropriate action to remedy any shortcomings. The Director of Programmes acts on the results of peer observation of teaching and reports from our External Examiners who are selected from comparator universities.

Further details on the University's quality assurance processes are given in the [Quality Handbook](#).

## Criteria for admission

---

The University's Admissions Policy (see [www.southampton.ac.uk/admissions-policy](http://www.southampton.ac.uk/admissions-policy)) applies equally to all programmes of study. The following are the typical entry criteria we use for selecting candidates for admission to our programmes.

### Entry Requirements

These requirements are reviewed annually by our Admissions team. Those stated below were correct as of July 2019.

#### GCSEs:

We require grades A-C in English, Mathematics and Science. If you lack these formal qualifications, your aptitude for the course will be assessed at interview. International students, whose first language is not English, must have already attained the necessary standard in English – see English Language Proficiency section below.

#### A Levels:

AAB (excluding general studies)

*Biology must be offered at A-level (minimum grade B) along with at least one other A-level science subject*

*A-level Science subjects considered include:*

A-level	Biology (minimum grade B)
Other science A-levels	Chemistry Physics Mathematics Psychology Environmental Science Geology Geography

### Alternative Qualifications

Our admissions requirement is normally defined on the basis of A/AS levels, but equivalent qualifications are accepted.

We do offer entry through a one year Science Foundation programme designed to enable you to qualify for entry to Honours degree programmes in Biological Sciences if you have not studied the appropriate Science subjects at GCE A level or equivalent standard. It is particularly appropriate if you are a mature student or if you have obtained good grades in non-science A-levels.

We will also accept applications from candidates offering other equivalent qualifications including Scottish and Irish Highers, European and International Baccalaureate, Access and Foundation courses and overseas qualifications.

More information on the entry requirements for Zoology can be found on the undergraduate courses webpage here - <https://www.southampton.ac.uk/biosci/undergraduate/courses.page>

### English Language Proficiency

All programmes at the University of Southampton are taught and assessed in the medium of English (other than those in modern foreign languages). Therefore, all applicants must demonstrate they possess at least a minimum standard of English language proficiency. Our minimum standard entry requirements are an IELTS Band C, i.e.

Overall	Reading	Writing	Speaking	Listening
6.5	5.5	5.5	5.5	5.5

Information on all acceptable English Language Tests can be found on the University website: [www.southampton.ac.uk/admissions-language](http://www.southampton.ac.uk/admissions-language)

## **Recognition of Prior Learning (RPL)**

The University has a Recognition of Prior Learning Policy. It may be possible to recognise formal credit for learning you have acquired in the past through formal study and/or through work and other life experiences. Your application will be considered on individual merit and you may be asked to attend an interview.

### **Mature applicants:**

Studying for a degree later in life can be extremely rewarding and mature students are often among our most successful.

If you are over 21 and feel you would benefit from degree-level studies, we can be more flexible about our entry requirements. For full-time courses, selectors will expect you to demonstrate your commitment by means of some recent serious study, for example, one or two A level passes, successful completion of an Open University foundation course or an appropriate Access course. Your application will be considered on individual merit and you may be asked to attend an interview.

Another popular option is to follow a certificate or diploma programme. These are available on a part time basis and most can be taken in the evenings, enabling you to continue to earn an income while you are studying.

## Career Opportunities

---

With an MSci Zoology degree you could be expected to find work in the following areas:

- Postgraduate degrees
- Teacher training
- Medicine
- Conservation and the environment
- Industry
- Journalism

## External Examiners(s) for the programme

---

**Name** Prof. Claire Grierson  
**Institution** University of Bristol

**Name** Dr Sebastian Shimeld  
**Institution** University of Oxford

Students must not contact External Examiner(s) directly, and external examiners have been advised to refer any such communications back to the University. Students should raise any general queries about the assessment and examination process for the programme with their Course Representative, for consideration through Staff: Student Liaison Committee in the first instance, and Student representatives on Staff: Student Liaison Committees will have the opportunity to consider external examiners' reports as part of the University's quality assurance process.

External examiners do not have a direct role in determining results for individual students, and students wishing to discuss their own performance in assessment should contact their personal tutor in the first instance.

---

**Please note:** This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities that are provided. More detailed information can be found in the programme handbook.

## Appendix 1: Additional Costs

Students are responsible for meeting the cost of essential textbooks, and of producing such essays, assignments, laboratory reports and dissertations as are required to fulfil the academic requirements for each programme of study. In addition to this, students registered for this programme typically also have to pay for the items listed in the table below

In some cases you'll be able to choose modules (which may have different costs associated with that module) which will change the overall cost of a programme to you. Details of such costs will be listed in the Module Profile. Please also ensure you read the section on additional costs in the University's Fees, Charges and Expenses Regulations in the University Calendar available at <http://www.calendar.soton.ac.uk/>.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
Approved Calculators		Candidates may use calculators in the examination room only as specified by the University and as permitted by the rubric of individual examination papers.
Stationery		You will be expected to provide your own day-to-day stationary items, e.g. pens, pencils, notebooks, etc. Any specialist stationery items will be specified under the Additional Costs tab of the relevant module profile.
Textbooks		Where a module specifies core texts these should generally be available on the reserve list in the library. However due to demand, students may prefer to buy their own copies. These can be purchased from any source.  Some modules suggest reading texts as <b>optional</b> background reading. The library may hold copies of such texts, or alternatively you may wish to purchase your own copies. Although not essential reading, you may benefit from the additional reading materials for the module.
Equipment and Materials	Laboratory and Field Equipment and Materials:	All materials required for laboratory or field work are provided. Where necessary, suitable specialist safety equipment will be provided.
IT	Computer Discs or USB drives	Students are expected to provide their own portable data storage device.
	Software Licenses	All software is provided
	Hardware	It is advisable that students provide their own laptop or personal computer, although shared facilities are available across the University campus.
Clothing	Lab Coats and safety spectacles	One laboratory coat and a pair of safety spectacles are provided at the start of the programme to each student. If these are lost the student must replace them at their own expense. The Students Union Shop stock these items.
	Field course clothing	You will need to wear suitable clothing when attending field courses, e.g. waterproofs, walking boots. You can purchase these from any source.
Printing and Photocopying Costs		Coursework such as essays; projects; dissertations may be submitted on line. In the majority of cases, though, students will be asked to provide a printed copy. The University printing costs are currently:  A4 - 4p per side (black and white) or 18p per side (colour) A3 - 8p per side (black and white) or 35p per side (colour)  Please Note: Paper sizes not recognised by the printing devices will prompt you to select the size and then charge a minimum of 50p per black and white copy and a maximum of £1 per colour copy.

Main Item	Sub-section	PROGRAMME SPECIFIC COSTS
		<p>You can pay for your printing by using the money loaders or by using print copy payment service by going to <a href="http://www.printcopypayments.soton.ac.uk">www.printcopypayments.soton.ac.uk</a></p> <p>Please remember that we are unable to refund any credit that has not been used by the end of your course, so please consider this when topping up your printing/copy account</p> <p>The <a href="#">University Print Centre</a> also offers a printing and copying service as well as a dissertation/binding service. Current printing and copying costs can be found <a href="#">here</a>. They also provide a large format printing service, e.g. Academic posters. Details of current costs can be found <a href="#">here</a>.</p>
<b>Fieldwork: Logistical costs</b>	Accommodation:	<p>For <i>compulsory</i> residential fieldcourses accommodation and travel are normally provided though where necessary, you will be expected to cover the cost of getting to and from the departure point which may be an airport. You are usually expected to cover the costs of food and drink, although some courses may include meals.</p> <p>For <i>optional</i> fieldcourses, you may be asked to make a contribution to the travel and/or accommodation costs.</p> <p>Undergraduates are automatically covered under the University's travel insurance whilst on organised and supervised fieldcourses. Those travelling independently in connection with their programme can be included under the University's travel insurance upon application - there may be a cost attached to this.</p> <p>There are also opportunities to undertake fieldcourses with another organisation, e.g. Operation Wallacea - for example see <a href="#">here</a>. Where necessary students will need to arrange and pay for any vaccinations.</p> <p>Specific details on what additional costs there are detailed in the individual module profiles which can be found under the modules tab of the <a href="#">programmes details</a> of the relevant academic unit.</p>
	Insurance (travel/health):	
	Travel Costs:	
	Immunisation/vaccination costs:	
	Other:	
<b>Placements (including Industrial Year out)</b>		<p>Students who choose to go on an industrial placement at the end of Part 2 can expect to cover costs for health and travel insurance, accommodation and living expenses; travel costs; visa costs.</p> <p>This will vary depending on which country you are travelling to.</p>
<b>Parking Costs</b>		<p>There may be a requirement to undertake work at Southampton General Hospital (SGH), for example during a research project. Students may need to cover costs for transport to travel to SGH or for car parking.</p>
<b>Other</b>	<b>Travel Costs</b>	<p>Students who opt to undertake a module delivered at Marwell Wildlife will be responsible for their own travel expenses.</p>

#### Revision History

1. Updated to take account of new Programme Specification template, September 2015
2. Minor updates following FEC April 2019
