Overview of Minor

1 Brief outline of the minor

This Minor provides a basic grounding in the theories, issues and methodologies which are central to the study of Public Policy, in order to explore and understand how the policy process works, how problems are defined in policy terms, how public policy is made and how policy interventions are designed across a range of policy areas and societal issues. The Minor provides for: the analysis of theories of the policy process; exploration of policy problems and solutions; interrogation of the complex nature of public intervention and the difficulties of coordination in order to secure desired outcomes; and analysis of the various ways in which policy actors are both constrained and empowered by the complexities of contemporary governance.

2 Learning and teaching

The learning and teaching methods concentrate on relating theory to practice, developing analytical abilities and skills, and examining the impact of policy actions in historical and contemporary contexts. Lectures are complemented by seminars and group activities, some employing simulation exercises and case study analysis.

3 Assessment

Assessment methods allow students to demonstrate achievement of the learning outcomes by prioritising analysis of complex material that is subject to multiple reasonable interpretations. Essays, policy papers, and group projects allow students to develop and present cases and arguments, focusing on the ultimately contested nature of explanations in the study of Public Policy.
Educational Aims of the Minor

Having successfully completed this programme you will be able to demonstrate:

- knowledge of the central theoretical and methodological issues in the study of public policy.
- knowledge of selected issues and events across a range of public policy arenas and sectors.
- capacity for the critical evaluation of theoretical perspectives and empirical evidence in the field of public policy, and for the application of such perspectives in your own work.
- capacity to undertake independent enquiry into public policy issues, using appropriate methodologies.
- skills in written and oral communication, the use of information technology, the analysis of different forms of information, and working co-operatively in groups to achieve designated outcomes.

Structure of Minor

1 Typical content

The Minor in Public Policy introduces and develops your understanding of public policy problems and solutions, as well as the competing traditions of enquiry and analysis that help scholars explore this field of study. Politics broadly concerns those things about which people disagree – about decisions and who makes them, the use of scarce resources, agreed agendas for action – and public policy analysis involves the exploration and impact of contested ideas about what ‘good’ public policy should look like, and the various policy tools and interventions that might be used to address societal problems. The Minor explores the workings of policy processes, the motivations and preferences of actors and stakeholders inside those processes, the fundamental difficulties of coordination associated with policy interventions, and why it often proves so difficult to put ‘good’ policy ideas into practice. The Minor enables you to gain knowledge and understanding about public policy and policy making in general, and also of the context of specific public policy analyses across key policy arenas.
